1895 Annual Catalogue of Celebrated Seeds

INDIANA SWEETHEART
THE FINEST IN AMERICA SEE NOVELTIES

Indianapolis, Ind. U.S.A
Mammoth Seed House erected 1892, owned by us and used exclusively by us in handling O.K. Seeds and Man-Weight Tools.

FOR EVERY DOLLAR SELECT $1.25 WORTH OF SEEDS IN PACKETS.

There is not another house in the country makes such a liberal offer. You don't need to buy more seeds than you need to get a discount. Any person can use a dollar's worth of seeds and everybody is entitled to the same discount. Sell O.K. Seeds at catalogue price and make 25 cents on every dollar's worth in packets. Make up a club. See all of your neighbors.

FREE BY MAIL. We deliver all our goods free by mail in 4-lb lots or less, also pints and quarts of beans, peas and corn, at prices quoted, unless stated to the contrary. Keep this in mind when comparing prices. When seeds are sent by freight or express the purchaser invariably pays the transportation charges, unless agreed to the contrary. You can get our choice O.K. Seeds at your postoffice, no difference where you live, as readily as though you came to our store in person.

WARRANTY. We warrant all our seeds to be O.K. or all right, and that they will grow with proper treatment, and be as represented, in so far that if they prove otherwise, we will refill the order or return the money. We exercise the greatest care to have our seeds pure, true and reliable, yet so many contingencies arise over which we have no control that we can not warrant the crop. If not accepted on these terms they must be returned at once.

OUR TERMS are cash with order. We have a great many orders to fill in the busy season from every county in the Union, and we can not undertake to open your accounts. We will occasionally send goods C. O. D. if the order is from a reliable party, though it is an unnecessary expense for our customers to return the money for C. O. D. items.

HOW TO REMIT a Registered Letter. This is one of the best and most convenient ways to remit, and the sender gets a receipt for the letter as soon as it reaches its destination. Every postmaster must register letters. Money Order, Bank Draft on New York, or Express. Stamps taken same as money in small amounts—1¢ preferred.

OUR MAIL in the busy season is enormous, being more than can be delivered by regular carrier, and we employ a special messenger to make frequent trips to the city postoffice, which is five squares distant. 1,000 letters at a single delivery is not unusual, and we have four or more deliveries each day, besides newspapers containing advertisements, circulars, samples, etc., swell the bulk greatly. The service of two clerks are required from 8 o'clock in the morning till 10 o'clock at night to open the letters and mark the remittances thereon. Our outgoing mail is so large as to excite surprise and comments from people passing. We send several wagon loads to the postoffice every day after the season opens.
A Few ... Red Letter ... Remarks

Good Friend—According to our regular custom, we again mail you our Annual Cata-
doe, alike to customers and others whose names we have, and who we believe are engaged
cultivating the ground to a greater or less extent, consequently need more or less seeds.
It is a fact that we mail many Catalogues that do not bring us orders, yet we contend
every person who plants seeds SHOULD, and at some time WILL, send us an order
though it be only to get a change of seed of the old variety, hence we dislike to
take his name from our list. We also know that if tens of thousands of people who
receive this Catalogue could be convinced of the GREAT IMPROVEMENTS THAT
WE YEARLY BEING MADE IN MANY VARIETIES OF VEGETABLES AND
RAIN, THEY WOULD HASTEN TO INTRODUCE

New Blood in Their Crops

ich will do more toward making farming pay than introducing new blood in their stock.
If YOU are one who has received our Catalogue in years past and never sent us an
order, we earnestly request a trial order for O. K. Seeds this season of 1895. An order for
a package of seeds will be thankfully received, and as we give

A Present to Every Customer,

We can expect one or more packages of CHOICE SEEDS FREE, and if you write on
order sheet a few names you can select ANOTHER PACKAGE, all for the trifling
vestment required for ONE PACKAGE OF SEEDS. Of course we hope you will
not send for more seeds, but if you do not, don't hesitate to take advantage of the above offers.
We want YOU as a customer for O. K. SEEDS, we want to give you some
other new customers for O. K. SEEDS.

An Extra Special Limited Offer.

Last Season we offered $1.50 worth of seeds in packages for $1.00 the season through.
uring the month of March it is almost impossible to keep up with orders working day
d night, and considering the fact that our prices on packages this season are individually
uder than before, we will limit our offer of

1.50 WORTH OF SEEDS FOR $1.00 TO FEBRUARY 20, 1895.

No other discounts can be used. They must be taken at prices given per packet. Send
all orders on this basis before above date.

DO YOU REALIZE what Packet Seeds cost you? To illustrate: $1.50 worth of
Packet Seeds for $1.00 makes 4c pkts, cost 23c each, 5c pkts, 3½c each, 10c pkts, 6½c each,
c pkts, 10c each, $1.25 for $1.00 makes 4c pkts, cost 4-1-5c, 5c pkts 4c, etc. Of no other
ouse in the country can you get high grade seeds for as little money. Our packages we
unteer to be as well filled as those from any other house. We put up no half size pkts.
y family can use a dollar's worth of Package Seeds and take advantage of this discount.
ANOTHER REASON why we can sell Package Seeds so cheaply is because we use
achines for putting them up. Just try to imagine a machine in which you put a lot of
eds and packages and the filled packages are turned out at the rate of 40,000 daily.
onderfull you exclaim. Yes, it is a wonder, and we invite all our friends to come
and see the wonderful machine do its work.
Special Offers On Onion Seed

One of our greatest specialties is ONION SEED. Notwithstanding the short crops and consequently general high prices, our crops have been fine and a full yield realized, therefore we propose to share the benefits with our customers. As it is not probable that we can buy Onion Seed later in the season to sell at the prices named below, it is understood that these prices may be withdrawn when our original stock is disposed of. For this reason it may be to your interest to order early. These prices are at purhchaser's expense for transportation. If you want free delivery and 10c per lb.

An order for 3 lbs. may be made up of more than one kind, but not less than 1 lb. of a kind will be sold at these rates.

Agents Wanted to Sell O.K. Seeds.

A large proportion of the people in every neighborhood send off for seeds every year. The balance save their seeds, or beg them, or buy them from commission boxes. Now nearly all these orders can be obtained for O.K. SEEDS if they were solicited and YOU will probably get them if we pay you for doing it. Now if you feel the pressure of hard times and want to make some money during the dull season, send for our

CONFIDENTIAL TERMS TO AGENTS.

Don't think that these confidential terms can be taken advantage of to procure a small lot of seed for your own planting. They can only be applied where the seeds are ordered by our agents to sell again or on orders already sold. If you want to sell O.K. Seeds—and we assure you it is the proper thing to do—send for

.. Agent's Complete Outfit

which will consist of A LIBERAL ASSORTMENT OF VEGETABLE AND FLOWER SEEDS in beautiful lithographed packages, all our own original designs, making the most beautiful packages ever used by any seed house. These packages, with illustrations painted from nature, will be of great assistance in selling the seeds, but we assure all that we do not put the best on the outside. Two beautiful large, lithographed hangars, one of flowers and one of vegetables, a supply of annual catalogues of celebrated O.K. Seeds, special circulars, order sheets, envelopes, etc., with CONFIDENTIAL WHOLESALE CATALOGUE FOR AGENTS. Where we have no dealer handling the Man-Weight Machines, if you desire to sell them, mention the fact and WE WILL SEND OUTFIT FOR THEM, ALSO.

For above outfit, to prevent annoyance from curiosity seekers and applications from people who do not mean business, we are obliged to make a moderate charge of 60 cents—the seeds alone are worth much more—which may be deducted when orders amount to $5.

Address all communications to

J. A. Everitt, Seedsman,

INDIANAPOLIS, IND.
A FEW WORDS ABOUT SEEDSMEN.

Each seedsman has his particular reasons why he should receive the public’s patronage. Consider carefully the inducements they offer. A catalogue four times as large as this one could not offer many more varieties, but would cost $43,000 more for the number we distribute. This cost would be added to the price of the seeds. The Prize-Paying Seedsman puts up the price to warrant him in paying prices to a few fancied gardeners. The ordinary gardener who has to hustle for a living never gets a prize, but he helps to pay them in every package of seed he buys. Cabbages bigger than a man and wheelbarrow may excite high hopes, but they are never realized. The Northern Seedsman deceives you in his broad claims. Seeds are grown North, East, South and West and then shipped to headquarters to distribute. We have as many northern grown seeds as any other seedsman, and can deliver them to you quicker and cheaper than from the far North. Beautiful lithographs please the eye, and often double the cost of seeds, because they are expensive, but the crop seldom equals your expectations. The Biggest Buildings do not shelter better seeds than those of a moderate size; high prices must be obtained to afford them. Eastern Seedsmen come west to grow the bulk of their seeds, then tell the dear public to “plant only Eastern Seeds.” Cheap Seeds appear to not care for trade. He lacks ambition to land a fish when he gets a bite. If you buy from the seedsman a long time in business, you pay roundly for the privilege. Old relics always come high, and oftentimes are not worth the money.

Without any extravagant claims, but with a neat catalogue, no premiums, reasonable illustrations, seeds grown where they find a suitable soil and climate, backed by facilities for handling our trade in the center of the country, we offer our O. K. SEEDS, and sufficient experience as seedsmen to intelligently execute the orders entrusted to us. We cast out our line baited with “O.K. Seeds at Fair Prices.” The public are not slow to see the advantages we offer, and their orders are ours. Thanks in advance.

ARE SOLD BY

J. A. EVERITT, Seedsman,

No. 123 West Washington Street, Indianapolis, Ind.

Telephone 1256. Branch at 50 North Delaware St.
Our List of Novelties and Specialties offered on the following pages is larger and better than ever before. Every article of genuine merit and sterling worth. They are gathered together from everywhere—tested, sifted and proved—many times the number being rejected as we give space. General list of Vegetable Seeds begins page 17. Floral Departments begin on page 42. Potatoes and Farm Seeds are in the back of the catalogue. We always have the best Potatoes, Corn and Oats, having made specialties of them ever since we began our business. While in, but greatest of all, are the celebrated Man-Weight Farm and Garden Tools. See last cover page and page 64 at once.

The Great Secret.

“Plant O.K. Seeds.”

COLUMBIAN MAMMOTH WHITE ASPARAGUS.

This new Asparagus is a sport from Conover’s Colossal, and is one of those rare instances where the new variety comes uniformly true to its distinctive type. Its principal departure from the old varieties lies in the fact that the shoots are pure white, and they remain so as long as fit for use. Extremely robust and vigorous habit, excel-ling any other sort in the size of its shoots.

First and Last Beet.

This very fine and decidedly improved variety of Beets was discovered several years ago. While it then showed superior qualities, it has been still further improved by careful growing and selecting for the ideal shape, size and color, until now, we believe, we have the perfect beet. The roots are of the very best form, with smooth skin and deep blood red flesh. Quality sweet and tender. It comes for use as early as Egyptian, of far better quality. If left in the ground they will continue to grow and attain large size for fall and winter, retaining all their good qualities, hence the name, First and Last. Top small and neat. All our customers should plant a package or more of this superior Beet.

Put. 10c, oz. 25c, ½ lb. 75c, 1 lb. 82.50.
GREAT BEANS

WILLOW LEAF LIMA.

An ever-bearing variety that matures its delicious Beans even in the far North. Wonderfully prolific and ornamental. 1,729 pods from one bean. Many growers North, South, East and West unite in pronouncing this the most wonderfully prolific bean known. This distinct new Lima makes a vine 12 to 20 feet long, so full of bloom and so loaded with pods throughout the season that it is the wonder of all. It is so robust and thrifty that it will grow and yield abundantly even in the short seasons of the North. It matures its luscious beans earlier than any other Lima, and continues to bear abundantly throughout the entire season, making it, in fact, an ever-bearing bean equally as good for market purposes as for family use, and so productive that only a few poles are needed to supply a large family. Think of being able to gather 20 well filled pods of Lima Beans at one grasp: it seems most impossible, yet it has been done with this variety. Some customers report that they have tried in vain to raise Lima Beans before, but have had no trouble with the Willow Leaf, so thrifty do the vines grow, so quickly produce pods, well filled with Lima Beans, which are of the most exquisite flavor. Besides giving an abundance of luscious Lima Beans it will be an ornament to your garden, each vine making a tall shaft of luxuriant foliage covered with bloom. Pkt. 10c, 3 pkts. 25c, pt. 30c, qt. 50c, by mail, post paid.

HORTICULTURAL POLE LIMA.

This is a highly important novelty as it is in every respect entirely distinct and meritorious. It is a cross between the common Lima and Horticultural Beans. Has the shape of the former and color of the latter, while its flavor is a combination of these two finest of all Beans. It is very prolific, bearing 5 to 7 beans in each pod, and is fully three weeks earlier than any other Lima. This is a most important fact. It can be grown in our Northern States and Canada, where no other Lima will mature. Pkt. 10c, 3 pkts. 25c, pt. 40c, qt. 75c, by mail.

EVANS’ TRIUMPH CELERY.

For solidity, crispness and fine nutty flavor it is not surpassed. Grows medium size, color creamy white. Besides all the good qualities enumerated, there is one still greater, namely, its keeping qualities. It can be kept late in the spring to April and May. It is also very economical, as every particle can be eaten. For market gardeners, late, use the “Triumph,”—always brings them out triumphant. Pkt. 15c, oz. 75c.
ROUGH & READY OR HARD HEADING CABBAGE

Owing to the peculiar and extraordinary keeping qualities of this cabbage, which preserves the heads until late spring as green as when gathered in the fall, it is pre-eminently the King of Cabbage for late spring selling.

For get up and getting there this new variety occupies the field without a competitor. Season late. Sure to produce large heads of the greatest solidity even under unfavorable circumstances. The heads grow medium to large size, but owing to their hardness, it is one of the heaviest cabbages grown. Those who have this cabbage for sale in the spring will have the market all to themselves, and remember this is the time the big prices are obtained.

Read what a few growers have to say about this cabbage:

Mr. R. M. Edgecomb, Mapleton, Mich.: "I have just (April 15) taken out a wagon load of your Hard Heading almost as green as when buried."

Mr. Jonas C. Schoor, of Cumberland, Pa.: "I put out fifty plants, and forty-nine made the heaviest heads I ever saw for the size and all so uniform!"

A market gardener writes: "I have tried all the favorite kinds of cabbage, but found no other half so good a keeper, it being in good market condition as late as the 15th of May, which is a fortnight after all other kinds of cabbage have played out. It also differs from all other kinds in making heads as hard as a rock; standing late frosts in the field better than any other sort, it is especially adapted for late autumn, winter and spring sales."

Pkt. 10c, oz. 35c, ½ lb. $1.25, lb. $4.00.

NEW CLIMBING JAPANESE CUCUMBER

This great novelty was introduced from Japan into Europe, where it created a great sensation and was the reigning novelty, and met with a phenomenal sale. From Europe it crossed over to this country, where they are also having an enormous sale.

The vines are healthy, vigorous growth, with rich, dark green foliage, and throw out strong, grasping tendrils, which enable it to climb trellis, wire netting, brush, or any other suitable support. It clings so tightly that it is not prostrated by heavy storms of wind or rain. It comes into bearing quickly and continues to set the fruits abundantly throughout the season, while the climbing habit of growth enables the hanging fruit to grow perfectly straight; of large size, from twelve to sixteen inches in length. The cucumbers are thick, exceedingly tender, and of delicate flavor; of cylindrical shape, flesh pure white, skin dark green turning to brown and netted, when ripe. They are of excellent quality for slicing, and when young make attractive pickles.

With this variety of cucumbers the product of a given area of ground can be increased three-fold, thus making them particularly valuable in small gardens or on high priced land. The vines continue bearing until late in fall. Our seed is imported direct from Japan. Pkt. 10c, 3 for 45c, oz. 30c.
GRAND NEW MUSK MELON THE COUNTESS.

A very distinct new variety and one that will not be equaled by any other new varieties that may be offered in the various catalogues this season. This new Melon “THE COUNTESS,” leads all up to date, 1893.

A distinctive feature is the slight neck on the stem end, which however is not in the least objectionable. Grow to large size, nearly round, square or blunt at blossom end, measuring about 12 inches in length by 8 inches in diameter and are very uniform in size.

Deeply ribbed, heavily netted on the ridges but smooth in the furrows between the ridges. In outward appearance it is strikingly handsome when ripe; the ridges being of a light green and yellow beneath the netting, while between the ridges the color seems like bright, transparent golden sunlight. The flesh is deep, measuring 2½ inches thick on an 8 inch melon. Deep, rich salmon in color, fine grained, sugary and melting; entirely devoid of any strong spicy flavor often found in red fleshed melons, and yet it has a richness and lusciousness of flavor exceedingly palatable.

WE HIGHLY RECOMMEND “THE COUNTESS” AND PREDICT THAT WHEREVER USED IT WILL GIVE HIGHEST SATISFACTION, AND WHERE PLACED ON SALE IT WILL TAKE THE LEAD. SUPPLY OF SEED IS SMALL AND CAN BE SOLD ONLY IN SMALL LOTS. PKT. 15c, 2 for 25c, OZ. 30c.

NEW ICEBERG LETTUCE.
Quick Growing, Hard, Handsome Heads, Exquisite in Flavor.

There is no handsomer or more solid Cabbage Lettuce in cultivation—it is strikingly beautiful. The large, curly leaves which cover the outside of the solid heads are of a bright, light green, with a very slight reddish tinge at the edges; they have small indents, which are constantly filled with dewdrops. They are thus kept fresh, and show a remarkably crystalline appearance, which well warrants the name of Iceberg.

The unusual solidity of the heads is insured by the large, white main ribs of the leaves, each of which, curving strongly into the center, acts like a truss, making it impossible for the leaves to open outward and expose the center, which is constantly thoroughly blanched. Whether in the early spring or the hottest days of summer, the quality is perfect. So long-standing and hard are the heads that they seldom shoot up to seed unless cut open with a knife. We confidently recommend the New Iceberg Lutuce as surpassingly fine for the home garden and equally valuable for market; its beautiful appearance insures quick sales. PKT. 10c, oz. 25c, ½ lb. 75c.

IMPROVED EXTRA EARLY DWARF ERFURT CAULIFLOWER.

It was our good fortune to meet in 1893 a gentleman from Denmark, who was attending the World’s Horticultural Congress held in connection with the World’s Fair, at Chicago, and who has made a great specialty of improving and growing fine strains of cauliflower. We have obtained a supply of his finest strain of the above named variety, which we now offer to our customers. The most critical trade can depend upon this seed giving satisfaction. The grower states as follows:

“My specialty in the seed line is a superior strain of Early Dwarf Erfurt Cauliflower seed, of which I have for a long series of years been working on. I will not expatiate on the excellence of my seed; suffice it to say that the principles I have been persistently and invariably employing enables me to always produce the best quality of this variety. My favorable location on the salt water sea coast and the very propitious seasons we enjoy, in connection with my very strict and merciless selection of seed bearing plants of the highest excellence in type and stamina, have put me in a position to furnish a quality of seed surpassing anything it has as yet been my good fortune to send out.”

J. PENDERSEN, Copenhagen, Denmark.

Price, pkt. 25c, ½ oz. 50c, 1 oz. $3.00, ½ lb. $8.00.
3 GREAT NEW WATER MELONS.

EACH ONE A GEM — THE 3 A GRAND COLLECTION.

INDIANA SWEET-HEART.

Our newest and greatest specialty in Water Melons. The most valuable Melon offered in years. An all-round Melon unsurpassed. Early, large, handsome, heavy, good shipper, long keeper, brightest color, best quality. Vines vigorous, very productive; ripens early and bears long. Fruit large, oval, very heavy mottled or netted like illustration; light and dark green. Rind thin, but very strong, making it a melon unsurpassed for shipping. Flesh melting and sweet. The best keeper. The Indiana Sweet-Heart Melon brings a good price, when others rot for want of purchasers. Pkt. 10c, 3 pkts. 25c, oz. 20c, ¼ lb. 75c, lb. $3.50.

TELEGRAMS.

see below.

COLE'S EARLY WATER MELON

As an every-day Melon for the amateur and for the home market unexcelled. Being somewhat brittle, will not do for shipping purposes. It is very early and will mature in every state; very hardy, vigorous and a sure cropper. It is sweet and delicate in texture of flesh—which is a deep red color—the rind is thin and the quality of the flesh is sustained clear to the rind. Melons of medium size, nearly round in shape, rind green, striped with lighter shades. As this variety combines all the desirable qualities of the best melon, it can be highly recommended for home use, and we feel certain that it will become a very popular variety. Pkt. 10c, 3 pkts. 25c, oz. 20c, ¼ lb. 50c, lb. $1.50.

GOLDEN HONEY WATER MELON.

If this Melon had nothing to recommend it except its quality, this of itself would be sufficient to merit a place with every grower. Take all the superlative adjectives in the English language and against them place this Melon for fine eating qualities and you have not over estimated it. Flesh is rich yellow. Its flavor is deliciously sweet and reminds one of honey; hence the name, Golden Honey. This is also one of the earliest Water Melons. Grows to a fine large size. Can not be used as a shipper; being too tender. It is a great acquisition. Pkt. 10c, 3 for 25c, oz. 25c, ⅛ lb. 75c.

TELEGRAMS — A Record Unsurpassed. "Sweet Hearts" bring fancy prices when others are not wanted. See description above and first cover page.

Cleveland, O., Aug. 20, '94. Sweet Hearts selling to-day 15c to 18c, others 12c to 15c. WILLIAMS BROS.

Columbus, O., Aug. 23, '94. Sweet Hearts selling 18c to 20c, Striped Melons 10c to 15c. WM. M. FISHER & SON.

Findley, O., Aug. 20, '94. Prefer Sweet Hearts; when can we have another car? ALTSCHUL BROS. & Co.

South Bend, Ind., Sept. 21, '94. Sweet Hearts perfect dainties. MILLS BROS.

ONE PKT. EACH OF 3 MELONS ABOVE 25c.
MOST MAGNIFICENT PEA OF ALL
PRINCE OF WALES

THIS GRAND PEA from Europe is the most popular in the great markets of their great cities. They are grown in immense quantities by the gardeners and always meet with a rapid sale. No person need hesitate about planting them in this country, as we have grown them here for three years. They are fully acclimated and do equally as well here as in their native country. To the producer they recommend themselves on account of their MAGNIFICENT LARGE PODS, GREAT PRODUCTIVENESS, FREEDOM FROM MILDEW, and the valuable quality of HOLDING THEIR COLOR LONG AFTER BEING PULLED. To the consumer, on account of their DELICIOUS FLAVOR and THE LARGE AMOUNT OF SHELLIED PEAS TO THE POD. Gardeners, whether for house use or market, where they have once used the PRINCE OF WALES PEA demand it again. In season they are medium, height about 2½ feet, seed very large, wrinkled vines hang very full of pods, which as stated, excel all others in yield of shelled peas. We cannot too strongly urge all who plant peas to give this variety a place in their collection, and note its fine qualities. Price, Pkt. 10c, 3 for 25c, plnt 30c, qt. 60c. By freight or express, qt. 40c, peck $2.00.

BIG MONEY IN ONIONS. You can realize $500 per acre if you start right by sowing our good seed and keep right by reading "THE NEW ONION CULTURE." Price 50c by mail. We will send it free to all who buy $5.00 worth of ONION SEED.

ONION SEED
is one of our great specialties, and one of our greatest specialties is the
OREGON YELLOW DANVERS or LONG KEEPER ONION.

This is one of the MOST BEAUTIFUL VARIETIES IN EXISTENCE. In shape, is intermediate between the Flat Danvers and Globe Danvers, with a full bottom and top. It is earlier than either variety named. A heavy yielder and the best keeper of all. We have kept specimens in our office from fall until spring, notwithstanding the warm temperature day and night. Of extraordinary value to grow onion sets, on account of its keeping qualities. All the sets we contract for our own use must be grown from this seed. The warm weather has no effect on our sets, while other people complain of difficulty of keeping theirs from growing. Price, pkt, 10c, oz. 25c, ½ lb. 50c, lb. $1.50, 5 lbs. or more by freight or express, $1.30 per lb.

(Colored Gent on wagon)—Now dat nigger 'peeks I steal deen melons. Golly, he don't know I's been usin' O. K. Seeds. Since Everitt has come with his good O. K. Seeds a gentleman can afford to live without stealing.

Some live by picking and stealing.
Some live, nobody knows how;
Some live (past all believing)—
Some live by the sweat of their brow.
Some in Providence trusting,
Some live like an old nail rusting;
Some live their friends all busting,
Some live by get-up and dusting—
Some plant O.K. Seeds, and they "get there" first.
Giant Summer Straightneck Squash.

On page 38 we offer the Giant Summer Crookneck Squash, which is a great improvement in size over the Old Summer Crookneck, but both the Old and New each have one bad fault: they will crook their necks. All growers regret this feature, as it spoils the shape, is liable to break off, besides in shipment they do not pack to advantage, the crook always occurring just where not wanted. In the Giant Straightneck we have overcome this bad feature; besides the size is large, shape uniform and quality superior to the old variety. We believe in this sort that we place before our customers the best summer bush Squash to be procured anywhere. Pkt. 10c, oz. 20c, 1/4 lb. 30c, lb. $1.50.

New Mammoth Hubbard Squash.

This new strain of Hubbard Squash surpasses the old in size, while not losing any of the fine table qualities that have made the original Hubbard the most popular squash ever known in the country. Our aim has been to increase the size as well as to improve the quality in this new strain. Our customers who grow the Mammoth Hubbard will see that we have succeeded. The flesh is the most delicate, fine-grained and sweetest of all. Can be had in use from September till May. We look for a large demand for seed, knowing this variety fully merits extensive cultivation. Pkt. 10c, oz. 20c, 1/4 lb. 50c, lb. $1.50.

NEW RADISH.

Market Gardeners' Ideal Long Scarlet.

This is not a new radish, strictly speaking, although many seedsmen would pass it off as such. It is an improved strain of the old reliable Long Scarlet Short Top. It is a week earlier than the old strain, has a shorter and more compact top; remains in good condition longer. In shape it is shorter and thicker, which is an advantage if not possible to market once when pulled. The upper portion is deep scarlet red, shading off to white at the tips, altogether making a radish of the most beautiful form and color. Pkt. 10c, oz. 20c, 1/4 lb. 50c, lb. $1.50.

GLASS RADISH.

This new radish is a fine acquisition. It is long, of light pink color, white tipped and of very uniform size. The flesh is of a transparent white, always crisp and brittle, even if grown to a large size, and mild flavored. It is named "Glass Radish" on account of the fine transparency of the flesh. All who have tried it pronounce it one of the finest among all the radishes. Pkt. 5c, oz. 10c, 1/2 lb. 30c, lb. $1.00.

"Wisconsin Tree Beans, splendid; Bush Lima, the finest for table I ever saw; Satisfaction Peas splendid for table; Logan's Giant Tomato, I never saw its equal; 12 plants raised 6 bu., some 24 in circumference." H. F. Stone, Oakland Co., Mich.
The Largest, Most Solid, Most Productive, Best Quality.

The few words above describe this GREAT TOMATO. Others claim wonderful and extraordinary qualities, offer prizes to induce big reports, but our Logan Giant Seedling comes out victorious every time. If you think you have had the largest Tomato, try this one now, and you will see that you did not have the largest and best hersetofore. It is not only a new variety, but we claim for it in points of productiveness, size of fruit, exquisite quality and flavor as well as early ripening, the best Tomato extant. They grow to weigh over 5 pounds each and attain the enormous circumference of 2 feet. This tomato is not like many others, one-third seeds and water. They are a great solid ball of tender delicious meat, with very few seeds. They have frequently sold at 1 1/2 cents each in competition with other kinds at 3 cents per bushel. If the vines are trained on a support, they will grow 10 feet high and be loaded with the finest fruit you ever placed your eyes on.

Advising early orders, as the two past last seasons we were obliged to cut down the size of our Packets to make them go around. We have several times as much seed this year, but we also expect a much greater demand, although during the last two season since we introduced it the demand was greater for this Tomato than for anything else that we catalogued.

READ THE FOLLOWING REPORTS: (All letters are on file in our office).

"Mr. Wade, of Blooming Valley, brought to this office a cluster of 3 tomatoes, all on a single stem, weighing 10 lbs. They are of the Logan Giant variety. The quality is equal to the quantity." - PENNA. FARMER, Pa.

"Logan Giant Tomato is the best I ever saw. I sold single tomatoes for 10 cents each; the product of a single stem for 16 cents. Single plants bore 30 pounds of fruit. Twelve weighed 20½ pounds. They ripen with the earliest." - D. L. MARSHALL, Mo.

Price, pkt. 20c, 3 pkts. 50c, 8 pkts. $1.00, 20 pkts. $2.00.

OUR GROWER WRITES, Nov. 10, 1894. We have had very good success with Logan's Giant Seedling Tomato, and hope to nearly it if not quite fill the orders for seed placed with us. We find this variety is one of, if not the largest of all Tomatoes, and in productiveness is excelled by none. It is a very shy seeder, but on account of its great productiveness we have had better success in procuring a crop of seed than we expected.

Yours truly,
JEROME B. RICE & Co., Cambridge, N. Y.
O.K. NETTED GEM

MUSK MELON.

This particular improved strain of the Netted Gem Melons we have produced by years of careful selection, and their superior quality is attested by numerous large growers in many important trucking sections of the country who regularly procure their seed of us. This variety of melons is largely grown and all planters should use the O.K. strain of seed. They are very prolific, small size, weighing 1 to 2 pounds. Flesh thick, green. Flavor lusciously sweet. The shape is almost a perfect globe. Extra early in ripening. They are usually marketed in baskets and crates, and it is the one variety that the markets are seldom overstocked with. We sell hundreds of pounds annually. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 85c.

THIS CATALOGUE REPRESENTS

ENTERPRISE—Any person examining this Catalogue or going through our house will see no lack of enterprise. The edition of our Catalogue is so large that two of the largest printing concerns in this city are taxed to their utmost to turn them out rapidly enough.

ABILITY—Come and look through our vast establishment and you will see we are able to conduct a large seed business.

CAPITAL—This is the vital part of any business. Money is the Life. We have money to buy right and seeds bought right can be sold right.

FACILITIES—There is not a seed house in the country with better facilities to execute your orders. Besides, we offer the advantage of central location. See 1st Cover Page.
Our great business, which now extends to every part of the world where seeds are planted and plants cultivated, was started by investing 50 cents in a new variety of potatoes. J. A. EVERITT, Seedsman.

THERE IS GOOD LUCK IN

Everitt's "ONWARD"

PROGRESS IS ONWARD, which is as it should be. When progress is backward, it denotes a bad condition of affairs. Our new potato is "ONWARD" also, and all who plant it, take a great step ONWARD toward making farming a success.

If it was not in our power to produce new varieties of potatoes, they would be in danger of becoming an extinct vegetable. All varieties run out and fail to produce paying crops. Every grower knows this is the case, and any grower who continues cultivating a variety after it has begun to deteriorate, does so at a loss. There is a great need now for a general purpose potato, one that can be depended upon to produce paying crops under unfavorable season conditions, which so often prevail; one that possesses so much natural vigor that failure is almost impossible. Such a potato we claim to have in our new "ONWARD."

Everitt's Onward Potato was produced from hybridized seed in 1890, taken from a seed ball. As soon as it was well developed it showed so many fine qualities that the originator, who is a large potato grower and experimenter (having grown not less than thirty varieties each season for ten years), chose it as his pet potato. It has proven a remarkable variety in several respects, and we confidently recommend it as a sort of the highest merit, and we pride ourselves on being expert judges of good potatoes. This potato is handsome that they sell at a premium on market when common varieties go begging. It is a fancy market sort. Tubers grow medium to very large, nicely bunched in the hill; even if small size they are smooth and handsome to be marketable. Color, white, slightly netted or dotted on skin, denoting good table quality. Shape long, flattened on sides. They never grow rough and prongy even where others sort out 25 per cent. They are medium in season of ripening, maturing in 100 to 120 days, and keep late in the spring. Flesh white, fine grained, Cook dry and mealy. Their magnificent size, desirable shape, beautiful, smooth, clean appearance and fine cooking qualities recommend them everywhere, and we predict they will have a great run, as have the celebrated Mammoth Pearl, O.K. Mammoth, Prolific Green Mountain, Early 6-Weeks Market and other potatoes of our introduction. A good investment will be to procure seeds of EVERITT'S ONWARD, this the first year of its introduction. There will be big money in introducing them in any neighborhood.

Price by mail, 1 lb. 50c, 3 lbs. $1.00, 4 lbs. $1.25. By freight or express, 2 bu. $1.00, ½ bu. $1.75, 1 bu. $3.00, per bbl. $7.50.

A GOOD INVESTMENT.

Potatoes of our introduction spring rapidly into popularity, and are bought up at fancy prices in every neighborhood. A few dollars invested in the ONWARD POTATO will net big profit.

(11)
New White Cap Yellow Dent Corn.

As will be noticed we give particular attention to Seed Corn this season, introducing two new kinds and listing four of our great specialties of former years. Owing to the great drought in 1894, good seed corn must be in demand, also the acreage that will be planted to corn will be large owing to the unsatisfied high price realized for wheat. In the boons every grower to select the best and most productive varieties, as the seed may make a difference of 10 to 25 bushels per acre on the crop. Each of our varieties have some distinctive features that commend over the others, yet we can not tell which one would suit particular farms the best. Hence we advise every corn grower to experiment for himself and select from our select collection that variety that gives him the best results.

We give the grower's description and recommendation of the New White Cap Yellow Dent Corn and knowing him to be a successful, in fact expert corn grower, we have no hesitation in placing before our friends this new sort:

"White Cap Yellow Dent is suitable for all climates and soils, and never grows large ears and matures early. The ears of the Leaming corn and is from 7 to 10 days earlier, and on poor, thin soil will yield thirty per cent. more corn. It will out-yield and out-shell the Leaming.

"It is a natural a yielder as weeds, grows strong, rank and quick, and will produce more corn on poor, thin soils than any kind now in cultivation. After growing different varieties of merit, S. H. Todd, of Huron Co., O., the largest breeder of Chester White hogs in the world, says, 'White Cap Yellow Dent beats them all. It is sure to yield to a crop of good, sound corn. It makes more bane and strength than any other corn, or any other sort.' One hundred farmers in Huron County, expert corn growers, will confirm all that can be said about this corn. Grown with over sixty varieties, it out-yielded all other kinds, and withstood the drought and wetter. This corn will be found to do those living in drouth sections and by those farmers who have poor, thin soil, while on strong, rich soil it has no superior. The tip ends of the grains are white, the inside yellow, making a beautiful color. There are more fine points combined in this corn than any other in cultivation.

Large growers in the great corn belt as well as those out of it, will be pleased with this corn because it is as natural a yielder as weeds. It yields large crops on poor, thin soil. The ears are large, handsome and well filled. It is sure to mature in from 90 to 95 days. It burns easy and shells easy. It commands the highest price. It will grow more bushels on poor, thin land than any other kind in the world. It stands the drought better than 60 other varieties grown in the same county. It has a large number of rows on the cob, making it a great yielder. It will out-yield and out-yield the Leaming. It grows its fodder strong, rank and quick, from 7 to 8 feet high. It is sure to please all who give it a trial." Pkt. 10c, Sample Ear 30c, 4 for $1.00, shelled 1 lb. 30c, 4 lbs. $1.00, peck 75c, bu. $2.50.

SECOND CROP SEED POTATOES

Extensive and thorough experiments have demonstrated that second crop potatoes are superior for seed in the north or south to first crop seed. Second crop potatoes are the potatoes grown from seed grown the same season planted late and harvested before they mature in the fall. The result is small but very productive potatoes with a great amount of sap and vitality. When planted they start a very vigorous plant and the vitality stored up in the tuber gives the plant a good start before it needs be dependent upon sustenance from the soil. Our second crop potatoes are grown in Tennessee from northern seed planted in the spring. Market gardeners and truckers can realize earlier crops and larger crops by planting our second crop seed and the grower who does not will be left by his enterprising neighbor. Much has been published in the agricultural press lately about second crop seed, and all writers who have investigated the matter agree in recommending them. We expect to be able to furnish the following varieties through the season, but as our stock is limited we advise early engagement.

We regret that we have not more space to devote to this important subject of Second Crop Seed Potatoes. Readers in this catalogue will do well, however, to continue the investigation and give them a thorough trial.

EARLY HARVEST

Tubers average very large - skin nearly white and grated eyes slightly indented, shape oval, flattened, flesh white and quality fine. This is an extremely early variety, one of the handsomest and very productive.

NEW QUEEN

Whether on poor thin soil or rich bottom land this potato has done surprisingly well. Very early, extra quality, wonderfully productive, size large, color white, shape long, smooth and clean. A second corn grower variety.

BEAUTY of HEBRON

A well known variety, largely grown. Our seed is pure and the genuine original Beauty of Hebron. A change of seed will no doubt be beneficial, to say nothing about the advantages of our Second Crop Seed.

PRICE OF EACH VARIETY—1 lb. 25c, 4 lbs. 75c, by mail. 1/2 bu. 75c, bu. $3.00, per bbl. $5.00.
HANDSOME, PRODUCTIVE, SWEET.

For Great Profit, Plant New Champion Sweet Corn

The earliest large corn ever introduced, being only a few days later than Cory, with ears nearly as large as the Stowells. Ears were grown ready for table use in 61 days from time of planting, and they weighed 1½ pound each, and were 12½ inches long by 8½ inches around. To help you realize these figures, get the largest ear of field corn you can find and compare measurements. This was grown with special culture. An average size is about 9 inches long. It has a medium size white cob and large pearly white kernels, very sweet, tender and full of milk. This corn has advantages over any other variety extant and combines all the good qualities of a general purpose Sweet Corn. No market gardener can afford to be without it, and every family garden should contain at least a few hills. Pkt. 10c, lb. 30c, 2 lbs. 50c, 4 lbs. $1.00, by mail; peek $1.50.

Golden Seal Field Corn.

It gives us great pleasure to be able to offer this season for the first time a variety of Early Corn of such great value as the one illustrated below and which we are pleased to name “Golden Seal.”

Probably nine-tenths of our readers are familiar with the extra early variety called “Pride of the North.” In comparison with that variety the Golden Seal grows a slightly larger ear than the true Pride of the North and is from 10 to 15 days earlier, maturing in about 80 days; a heavy yielder, considering its extreme earliness and a beautiful corn both in ear and shelled, being a rich golden yellow. This corn is suitable for any section where corn is grown in the United States. Being the earliest variety it recommends itself to growers North while for farther South it will produce a sure crop on poor thin soil or on rich soil, even in a dry season, while for replanting or late planting is just what you want. Our crop this season was grown without rain from planting to harvesting except a shower that fell immediately after planting and beat the ground down, doing more harm than good, yet notwithstanding the unfavorable season the yield was over 70 bushels per acre. Stalk grows 7 to 9 feet high, making its growth quickly. Ears set 3 to 4 feet from the ground and generally two ears and sometimes three to each stalk; ears 8 inches long, grain deep; cob small, color of cob red. Out-yields Pride of the North 2½ to 3½ bushels per acre and in a dry season, such as we have had in Indiana for two years, Golden Seal out-yields every other kind of whatever description on high ground or poor thin soil. Every farmer should procure seed of this new sort as he will need it, if in the North for general crop. If South, to plant for early feeding or for late crops (as late as July 4th), or for replanting.

New Golden Seal Corn

By J. A. Everitt Seedsman

Price Our supply of Golden Seal Corn is quite limited this year and we cannot sell more than 4 pounds to any one person; also we make it a condition of sale that each purchaser will report yield and time of maturity of his crop. Pkt. 10c, lb. 30c, 2 lbs. 50c, 4 lbs. $1.00, by mail. By freight or express, 4 lbs. 60c.
2 BEAUTIFUL CLIMBERS.

THE BEAUTIFUL, FRAGRANT CINNAMON VINE.

A beautiful and rapid climber, possessing the rare quality of chitting from its flowers the delightful odor of cinnamon, and very appropriately called the "Cinnamon Vine." The plants are grown from bulbs or roots, and are very nice for window ornaments or outdoor culture. They are perfectly hardy, the stem dying down every autumn, but growing again in the spring so rapidly as to completely cover any trellis or arbor very early in the season. The vines often run 25 feet or more, and when trained over and about a door or window make an ornament much admired, while its many clusters of delicate white flowers send out an amount of fragrance that is truly wonderful. It is easy to cultivate; has no insect enemies, and is not affected by drought, because it roots so deep. The tubers are called "Chinese Yams" (the botanical name being Dolichos Batatas); they increase in size from year to year; are often two feet long at two or three years of age, and run straight down in deep soil. Flesh whiter than superfine flour and equally as good for table use as the very best potatoes. We have sold these bulbs for several years, and the plant has ever increased in popularity. We have always charged 25 cts. for 5 bulbs, but this year we are prepared to offer 1 dozen large bulbs, finer than we ever had before, in a neat box, by mail, postpaid, for 30c, 2 boxes for 50c, 5 for $1.

NEW YELLOW DOLICHOS.

This luxuriantly flowering vine is a most welcome addition to the list of annual climbers, and as a late, beautiful and prolific bloomer should have a place in every flower garden, or wherever bare walls or unsightly objects are to be hidden from the eye. It blooms later in the season than other varieties, being at its best when earlier climbers are brown and dead.

Erect racemes of bright yellow blooms, similar in shape to half-opened pea blossoms, form at every joint, and the leaves and stems are covered with downy, grayish hairs, producing a most novel effect. The outer surface of the petals is rich brown, interior space or standards soft, glowing canary yellow. The blossoms are succeeded by slender, rounded pods, which lend additional beauty to the vines, and are far more effective than the broad, coarse pods found in other varieties. The dense foliage of this new Dolichos stands out in striking contrast to others, covering the poles with a heavy mass of vines when most other varieties were half way up the poles. Pkt. 10c, 3 for 25c, oz. 40c.

SPECIAL. For 35c we will send by mail postpaid, 1 dozen large bulbs of Cinnamon Vines and 1 pkt. New Yellow Dolichos.
NEW SWEET PEA.

AMERICAN BELLE.

FIRST introduced last year. We now have this variety so that it comes quite true from seed, which, unfortunately, was not the case last season. It shows an important departure from the colorings and markings of all other varieties—being neither striped nor mottled, but distinctly spotted. The standard is clear, bright rose of uniform coloring; wings of crystal-white with bright purplish-carmine spots. The flowers are very large, of good substance, and finely formed, while the standard does not have that tendency to droop so common in other large-flowered varieties. Of such good substance are the flowers that they remain perfect and keep well in a bouquet for a long time, thus rendering this variety most desirable for cut flowers. Pkt. 10c, 3 pkts. 25c, oz. 40c.

Ricinus Zanzibarensis.

The New Giant Castor Oil Plant from Africa.

From seed sown in the open ground in May the plants are in full foliage early in July, and attain a height of twelve to fourteen feet. The leaves are fully two and a half feet broad, beautifully lobed; the whole plant has a distinct and novel appearance, enhanced in the sunshine by a bright metallic hue; they charm at first sight, and their usefulness is very great. Solitary on the lawn, it makes a perfect pyramid of foliage, thickly set with gigantic leaves; a dozen in a large bed make a most picturesque sight. Have you an ugly-looking corner? Simply plant a few of these new Giant Castor Oil Beans and you will be surprised how quickly it disappears. As an ornamental sub-tropical plant the RICINUS ZANZIBARENSIS has no equal. We offer the finest home-grown seed at a moderate price. Pkt. 10c, 3 pkts. 25c, oz. 25c, ½ lb. 75c, lb. $2.50, postpaid.

Now dat is a pumkin dat some pumkin be. Dar's a year's good libin' for de chilun an' me. It has got so now-a-days, by the help of O. K. Seeds, Dat a gentleman can afford to raise a familee.

"You chilun jes' cum down off dat O. K. Pumkin. You want to fall off dar and broke yer necks?"
WE OFFER NO PREMIUMS for extra specimens or yields.

Ordinary farmers can not compete with fancy farmers to obtain them, as the latter put months of work on such crops. We offer you good, reliable seeds which require no fancy cultivation to give you satisfaction. Ordinary farmers can purchase these ordinary seeds, and unless they buy some that they KNOW you, all is well, and this will prove the metal O.K. Seeds are made of.

SOME NEW MACHINES, GREAT MACHINES,
Which abolish much of the drudgery of cultivating the soil, making slow, laborious, disagreeable labor rapid, easy and pleasant.

EVERITT'S MAN-WEIGHT
FLOW, HOE, CULTIVATOR, DRILL, ETC. SINGLE AND DOUBLE WHEEL AND COMBINED.
Patented in the United States, Canada, Great Britain, France, Germany, Austria and Belgium.

Will revolutionize Hand Power Cultivation and makes keeping a horse an unnecessary expense in many cases.

MODERN scientists and inventors are devoting their time and energies to the problems of utilizing waste. There are fewer new things "under the sun" than many people imagine, but the manners of utilizing them are what causes us to hold up our hands in astonishment. Steam is as old as the earth, yet the steam engine which utilizes what was wasted for thousands of years is of very modern construction. Who will doubt the existence of electricity since the foundations of the world were laid? It remained perfect for Franklin to found the foundation of its usefulness, and Edison and others to utilize it for the great benefits of mankind. The wind which cooled the brows of Adam and Eve in Paradise, and has ever been present, restless and unchained, has been harnessed and now does the will of man. There is sufficient force unconsciously going to waste in our cities and towns daily every day to drive every manufactory needing power. Every man, woman and child, whether in city or country, is continually setting a force equal to the weight of the body, whether lying down, sitting, standing or walking. This force, equal to millions of pounds, has been going to waste in all time past, and from the condition of things, must continue to be wasted, to a great extent, for all time to come. But why not utilize it to as great an extent as possible? If this force, which every person must exert, can be utilized by the agricultural classes to the saving of muscular exertion, will it not be a great boon? And will not he who perfects an appliance that allows the man, as he walks across his fields, to take part of his weight (force) off the ground and use it for planting or cultivating his crops, to the saving of muscular exertion, be a public benefactor? We are now ready to call attention to Everitt's Celebrated Man-Weight Farm and Garden Tools.

EVERITT'S CELEBRATED MAN-WEIGHT FARM and GARDEN TOOLS.

THESE great machines were invented and patented by J. A. Everitt, in 1891, and greatly improved for 1895. The great advantage of this invention can be partly understood by studying the illustrations on last cover page. Not one person can truly realize their grand advantage, until he uses the machines. They are a great boon to all cultivators of the soil, and must be classed with the great inventions of the age, yet they are so simple that the natural question with every one is: Why did I not think of that? So nicely do they fill a want existing with thousands of gardeners, nurseriesmen, seedsmen, florists and farmers, that after the first trial they invariably conclude to "never do without them." The Man-Weight Cultivators are worth their weight in silver, if not in gold, to any one who cultivates the soil. All who have used the machines unanimously endorse them in the strongest language. We have heard sensible, shrewd gardeners remark: "I would not sell them for $25." "$100 would not tempt me to do without them one season." etc. They are the only machines we know of that suggests sufficient merit and practical utility at first sight to sell without a trial. The first gardener who saw the machine at Indianapolis, gave his order for the first one we could make. Other gardeners at once acknowledged that it is just what they want, and many remarked that "if all gardeners knew of these machines they could not be made fast enough to supply the demand." A trial by any person will demonstrate the wonderful utility of these machines. Any person possessing them will find it impossible for his neighbors to compete with him in raising crops.

There are several features on the Man-Weight Tools which are novel and make a tool vastly superior to any other hand power or horse machines:

1. We mention the push bar. In operation, the body is inclined forward, thus taking part of the weight of the body off of the ground and directing it against the machine. In this way the machine is propelled by the weight of the body, without any muscular exertion whatsoever. To those who object to using this machine, because, as some have said, "we won't be a horse," we will say to push this machine across the field is no harder than to walk across empty handed. Your weight does the work. Without this machine all your weight is wasted on the ground.

2. By means of the push bar we propel and guide the machine, hence the drag-bar can be hinged, and are adjustable in all directions; thus the tools attached to the drag-bars perform the work just as a weeder would in your hands. It is the only cultivator made that (Continued on page 64 and last Cover).
CREAM, NOT SKIM MILK is what we deal in, and the following list will be found to contain the CREAM of the Varieties. Hence, if we don't catalogue as many varieties as some other seedsmen, you can still get the CREAM or the BEST, from us, and the best is not too good for our customers. O.K. SEEDS GIVE BETTER AVERAGE RESULTS than those obtained from any other source at a less cost. WE COUNT ON YOUR ORDER SURE.

**ARTICHOKE**—Green Globe—The flower head in their green state is the part used of this variety. One oz. will produce about 500 plants. Pkt. 10c, oz. 30c, 1/2 lb. 75c, lb. $2.25.

**MAMMOTH WHITE FRENCH**—The greatest food for hogs known. A sure preventative of hog cholera. Also are an excellent food for horses, cattle and sheep. Yield 500 to 1,000 bushels per acre. This dry season, 1891, our yield is over 800 bushels per acre and they can be depended upon wet season or dry to produce a crop. Freezing and thawing does not injure them while in the ground, and hogs feed themselves when the ground is not frozen. On every farm they should be found, and judiciously used no other crop will equal them for profit. 3 bu. will plant half an acre. By mail, 1 lb. 25c, 4 lbs. 75c. By freight or express, 1/4 bu. 50c, bu. $1.50, bbl. of 3 buses $4.00.

**ASPARAGUS COLUMBIAN Mammoth White**—See novelities.

**Conover’s Colossal**—A splendid variety of very large size and superior table qualities. One oz. will sow 50 feet of Drill. Pkt. 5c, oz. 8c, lb. 50c.

**PALMETTO**—Stalks frequently measure two inches in diameter, and even when twelve inches, long are tender when cooked. Of medium green color, excellent flavor and attractive size. It is a leading market sort. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.

**ASPARAGUS ROOTS**—Two years old. By mail, doz. 25c, 50 75c, 100 $1.50. By freight or express, 100 $1.00, 1,000 $8.00.

The Earliest Snap Short in the Country.

**LIGHTNING EARLY VALENTINE BEAN**—The most profitable variety for market. This variety is well named, as it is lightning in ripening in comparison with any other stock of this popular bean. The pods are large, it is very productive, and, when young, entirely stringless. It can not be recommended too highly to the market gardener, as he derives his greatest profit from the earliest crops. With the Lightning Early Valentine you beat your competitor one to two weeks, which means many dollars in profits. Sure to give satisfaction. Pkt. 10c, pt. 30c, qt. 50c, by mail, post paid. By freight or express, 1 peck $1.50, bu. $5.00.

**LIGHTNING EARLY VALENTINE BEAN. 5 WEEKS FROM PLANTING.**
WHITE WONDER FIELD—A very early field bean that can be planted on ground where other crops have been removed. It greatly outyields the Navy, on same ground and under same conditions. Seed is about the size of Navies and can be marketed as such, although the cooking qualities are superior. Pods large and closely filled. They are wonderfully productive, having yielded at the rate of 500 bu. per acre. Our trade in this bean is very large. We recommend them highly. Pkt. 5c, pt. 20c, qt. 35c, peck $1.00, bu. $3.75.

WISCONSIN TREE—Introduced by us in 1893, and we claim it is the best field bean in the country. Our customers who have grown them bear us out in this assertion. It is quite distinct from the Mexican or California Tree Bean. The beans being twice as large, are far more productive and very early. Grows to height of 18 to 20 inches. The beans are very white, of finest flavor and cook in much less time than the Navies. Parties who have been growing the old Tree Bean will find the Wisconsin a great improvement in all respects. We advise all who put out a crop of field beans to plant the White Wonder and Wisconsin Tree Bean, and they will be convinced of their superiority. Pkt. 5c, pt. 25c, qt. 40c, peck, $1.23, bu. $4.00.

Golden Wax—A standard sort; very early; pods brittle, long, entire; stringless and of a rich golden-wax color, of dwarf, compact habit, productive. Pkt. 5c, pt. 2 c., qt. 50c, peck $1.50, bu. $5.75.

New Extra Early Refugee—This is a selection from the well known Refugee, and will be ready for market ten days earlier, or about the time the ordinary Refugee is in flower; is an immense yielder and sure to produce a crop in either wet or dry season. Best for pickling. Pkt. 5c, pt. 25c, qt. 40c, peck $1.23, bu. $4.00.

Early Mohawk—Very hardy, early and productive; an old sort, green pods. Pkt. 5c, pt. 20c, qt. 35c, peck $1, bu. $1.00.

CHALLENGE BLACK WAX—In earliness and uniformity of ripening this Wax Bean excels all others. All the plants will give a full extra early picking instead of an occasional early plant, as in other kinds. This habit is of inestimable value to market gardeners, and we will say that where known, the Challenge Black Wax is held in the highest esteem. Plants are very vigorous and more upright than the old German Wax, which should be discarded on account of the great superiority of this. Pods are large, of good color. Stringless and of superior flavor. Pkt. 5c, pt. 25c, qt. 40c, peck $1.50.

Remember we Pay Postage on Pkts., Pts. and Qts. of 7 splendid Beasts 30 cts.

BEST OF ALL

Wardwell’s Dwarf Kidney Wax—A week earlier and yield a third more than Golden Wax. Stalk erect. Pods long, broad, flat, brittle, stringless. Of a delicate wax color. Seed white, with a reddish purple spot. Pkt. 8c, pt. 25c, qt. 50c, ½ bu. $1.75, bu. $6.00.

Rust Proof Golden Wax—This is the handsomest and hardest of all Wax Beans. Pods long, thick and entirely rust proof. Much excels the Golden Wax in yield and is of better quality. Should be grown in every garden. Pkt. 5c, pt. 25c, qt. 40c, peck $1.50, bu. $5.50.

Improved Early Yellow 6 Weeks—A very early variety; long, green, flat pods. Excellent quality. Pkt. 5c, pt. 20c, qt. 35c, peck $1.25, bu. $4.75.

Improved Early Red Valentine—More extensively grown than any other bush bean. Pods green, thick and fleshy, of the finest quality. Pkt. 5c, pt. 20c, qt. 35c, peck $1.00, bu. $4.00.

We pay postage on Beans offered by Pkt, Pint and Quart. Larger quantities are sent by freight or express at expense of purchaser.

Wardwells Dwarf Kidney Wax.
BEANS POLE OF RUNNING

LAZY WIVES—No good wife would like to be called a "lazy wife," yet she will be excused for exhibiting a lazy spell when "bean picking" time comes, if she has the foresight to plant this variety. They are called lazy wives because they hang so full and the pods are long and broad that a mess is soon picked. The pods are wonderfully broad, thick, fleshy and entirely stringless, retaining all their good qualities until nearly ripe. The peculiar taste and agreeable flavor of this bean are so captivating that other varieties are not desired while the Lazy Wives can be obtained. Pkt. 10c, 25c, 50c.

GOLDEN ANDALUSIAN—The pods are 6 to 8 ins. long, thick, fleshy and stringless. It is very common to pick 1½ bu. from a single vine at one picking; begin bearing when quite young and continue till frost. The beans are pure white and are a fine winter shell bean. Pkt. 10c, 30c, 50c.

EARLY GOLDEN ANDALUSIAN—While it grows rapidly, being very early, clusters of three to six pods of rich golden color. Pods average about 8 in. in length, tender and entirely stringless, retaining their plumpness and tenderness long after they have reached full size and continue to bear, if the pods are picked, until frost. Pkt. 10c, 30c, 50c.

WHITETIP KING BUSH—This string bean is simply perfection. It has handsome, green pods from 5 to 6 ins. long, perfectly round, with a crest in the back. They ripen early and bear continuously all summer, and produce a large yield of long, smooth and tender kernels. They make an excellent garden plant. Pkt. 10c, 25c, 40c, 1/4 lb. $1.75.

LIMA BEANS

can now be grown with so little trouble that every family should have an abundance.

POLE LIMA BEANS

Dreer's Improved—An improvement in quality on the Large Lima. They are plumper and richer; grow in green longer. Pkt. 10c, 25c, 50c, 100c $2.25.

Large White—This well known and delicious bean is everywhere esteemed. Very large. Pkt. 10c, 25c, 50c, 100c $2.25.

King of the Garden—A magnificent variety in growth, perfection in size and number and size of pods. Specimens have been grown over nine inches in length, containing seven large beans. Pkt. 10c, 25c, 50c, 100c $2.25.

Challenge—Have been constantly improved by saving beans from the strongest vines and best filled pods. They yield an amazing quantity of shell beans. Pkt. 10c, 25c, 50c, 100c $2.25.
BEETS Table Varieties. Prices of all varieties in this list except where given. Pkt. 4c, oz. 8c, $1/2 lb. 20c, lb. 60c, post paid. By freight or express, $3 lbs. or more of a kind, 50c per lb.

EARLY OTHELLO—A dark blood turnip variety, unsurpassed for market gardeners who require a variety of the darkest color; also in beauty of form and sweetness of flavor is without a peer. Pkt. 10c, oz. 50c, 1/4 lb. 50c, lb. $1.50.

IMPROVED BLOOD TURNIP—The best strain of this popular sort. The result of years of careful selection, which has increased its size and made it earlier. Color rich, deep red, fine grain, solid. Excellent for all purposes.

ECLIPSE—A great acquisition to our list of turnip beets. Always gives the greatest satisfaction among market gardeners. It is as early as the Egyptian, and much more desirable, owing to its globe shape, great smoothness and regularity, having a small top, very sweet, flesh fine and dark blood color.

EDMUND'S TURNIP—A selected strain very uniform and even in type; flesh deep blood red color exceedingly sweet and tender; of good market size. It is very early, and for marketmen's use is justly popular and much called for wherever it has been sold.

Extra Early Egyptian—Ten days to two weeks earlier than the Blood Turnip. Of fair quality, medium size; fine for forcing.

IMPROVED LONG BLOOD RED—One of the finest beets for winter family use; also, on account of its great productiveness very valuable to grow for cattle. Sweet, crisp and tender; color rich red; withstands drought.

Dewing's Improved Blood Turnip—Very symmetrical in shape and free from fibrous roots; flesh deep blood red.

HALF-LONG BLOOD—An excellent second early. Good also for winter use.

LENTZ'S EXTRA EARLY BLOOD TURNIP—As early as Egyptian, larger and of unsurpassed quality, being tender and sweet at all times, old or young. Will produce a crop Six Weeks from planting. Pkt. 10c, oz. 20c, 1/4 lb. 50c, lb. $1.50.

Bastian's Extra Early—Very early, of quick, large growth; fine turnip form, and bright red color.

Early Flat Bassano—Early, roots flat, turnip-shaped; flesh white, circled with rose color.

Early Yellow Turnip—Similar to Blood Turnip in form, but yellow flesh.

Swiss Chard—A distinct vegetable, and makes superior greens. The ribs are used as asparagus, the leaves as spinach. We recommend all our customers to grow it.

MANGEL WURZEL AND SUGAR BEETS.

FOR STOCK FBBD.

Price of all Varieties: Pkt. 4c, oz. 8c, 1/4 lb. 20c, lb. 50c, by mail. By freight or express, 3 lbs. or more at 30c per lb.

MAMMOTH GOLDEN GIANT—Color yellow, broad at top and bottom, making very heavy roots. A favorite with leading farmers.

MAMMOTH LONG RED—Grows to an immense size, single roots weighing 30 to 50 lbs. Under high culture 2,000 bushels per acre have been grown. Quality excellent.

GOLDEN TANKARD—The flesh is deep yellow to the center. One of the best and richest for feed for sheep and cattle. Highly prized by stockmen.

CHAMPION YELLOW GLOBE—The short root makes it particularly valuable for light soils, of fine quality and a heavy cropper.

LANE'S SUGAR BEET—Long symmetrical roots, fine grained and very sweet; a heavy cropper, splendid for table use or cattle feeding.

FRENCH YELLOW SUGAR—Grows very large, much above ground. Very rich in sugar.

VILMORIN'S SUGAR BEET—Color white, medium size. Greatly esteemed by sugar manufacturers.
EVERITT’S SHORT STEM DRUM HEAD CABBAGE—This famous matchless variety, illustrated above, has no superior as a variety for truckers to grow for shipment, also for market use. Very reliable to head in the south. Grows compact, with few loose leaves. Withstands drought well. Seldom bursts or rots. Heads frequently weigh over 30 lbs. each. Pkt. 10c, oz. 25c, ¼ lb. 50c, lb. $2.50.

EVERITT’S EARLIEST—The earliest of all and the best very early Cabbage in the country. Produces fine, solid heads 70 days from sowing the seed. Plant Everitt’s Earliest and astonish your neighbors. Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. $2.50.

EVERITT’S EARLIEST GIANT—Not quite so early as the preceding, but a much larger head. No other variety grows as rapidly as this and early in the summer you have cabbage heads equaling the fall and winter sorts. Heads very solid. If planted late is a fine fall and winter sort. Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. $2.50.

Imp. Early Winnigstadt—One of the best Extra Earlies, being sure head and will grow a head under circumstances where many others would fail. Heads conical shaped, very hard and almost proof against the cabbage worm, which cannot penetrate the head. Valuable for summer, fall and winter. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.

ALL HEAD EARLY—A new variety and one of the largest Earlies in cultivation. Being a very thoroughbred variety the heads are very uniform and it is very certain to head; growth compact, admirable close planting. If planted late is a splendid winter cabbage. Pkt. 5c, oz. 20c, ¼ lb. 75c, lb. $2.50.

IMP. EARLY SUMMER—A popular sort. Our strain of this peerless cabbage is not excelled. Fine, large, solid heads will form in 90 days from sowing the seed.

SELECTED EARLY JERSEY WAKEFIELD—A favorite Market Gardener’s sort. Heads very compact, solid, of conical shape. Few outside leaves. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.

Fottler’s Improved Brunswick—One of the most satisfactory early Drumhead varieties. Produces a large, firm, solid head, often weighing from 20 to 30 pounds. The quality is excellent. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.

Early Eltmans—Forms fine, solid, pointed heads. Of extra quality. Pkt. 4c, oz. 15c, ¼ lb. 40c, lb. $1.50.

Early York—A well-known early sort. Heads small, but firm. May be planted eighteen inches apart. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.50.

Marblehead Mammoth Drumhead—The largest headed cabbage. Its size is indeed mammoth, and yet the heads are real solid. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.

EARLY FLAT DUTCH—Wonderfully popular wherever grown. A good second early, of excellent quality. Heads large, sound and solid. Pkt. 5c, oz. 25c, ½ lb. 75c, lb. $2.50.
This new, distinct and valuable variety of Cabbage can be sown in the fall and will not run to seed like most early sorts, when wintered over. This fact will make it a favorite in the south and with northern growers who still use cold frames. It is really an “All Seasons” variety. Sown in the fall or in early hot-beds it will head immediately after the Wakefield, and may be sown at intervals until July 1st to 10th, when the sowing for winter use should be made. The originator, who is the largest grower of cabbage seed on Long Island, says: “The ‘None-Such’ is unquestionably the best Cabbage for general purposes ever introduced. Succeeds admirably as a second early, summer, fall or winter variety in every section of the United States and Canada, ‘Long Island gardeners and others who saw this Cabbage growing willingly paid $1.00 per pound for the seed.” We hope every one of our customers will include in their orders a package of this fine Cabbage. Pkt. 10c; 3 for 25c, oz. 30c, ½ lb. $1.00, 1 lb. $3.50.

FACT: That O. K. Seeds are Very Popular. That Everitt's Man-Weights are Best.

AUTUMN KING—A grand autumn and winter cabbage. Heads of enormous size and very solid. This variety excels all others in weight of crop per acre. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.50.

ALL SEASONS—We have sold this reliable variety for 7 years with the greatest satisfaction to our customers. If sown early will produce large heads early, and if sown late is a superior winter sort. We sell this cabbage in large quantities to many large growers who prefer it to all others. Pkt. 5c, oz. 25c, ¼ lb. 65c, lb. $2.00.

EVERITT'S SUPERIOR LARGE LATE FLAT DUTCH—Late Flat Dutch Cabbage is well known as to scarcely need description. Our “superior” strain is unexcelled and we sell large quantities. Pkt. 4c, oz. 15c, ½ lb. 50c, 1 lb. $1.75.

SUCCESSION—Medium early, and a fine fall and winter cabbage. This variety is one of the surest to head, scarcely a plant failing. Pkt. 5c, oz. 20c, ¼ lb. 65c, 1 lb. $2.00.

SURE HEAD—Takes its name from its quality of always heading up, even under unfavorable conditions. In all cases gives great satisfaction for general crop. Pkt. 5c, oz. 20c, ¼ lb. 65c, 1 lb. $2.00.

Drumhead Savoy—A very large-headed variety, partaking of the size of the Drumhead Cabbage; flavor of the Savoys. Pkt. 5c, oz. 20c, ¼ lb. 65c, 1 lb. $2.00.

CAULIFLOWER.

EARLY SNOWBALL—Probably grown more than all other varieties together, for forcing or wintering over for early crop. It is exceedingly early and hardy and is one of the surest to make a solid, compact head. Pkt. 18c, ½ oz. $1.50, oz. $2.50, ½ lb. $8.00.

EXTRA EARLY DWARF EFFURT—Very desirable for forcing or for planting out doors. Plants compact, with very narrow, tight leaves, making it the best for close planting; forms solid, compact heads under very unfavorable conditions. Our stock is unsurpassed. Pkt. 18c, ½ oz. $1.00, oz. $2.00, ½ lb. $7.50.

BRUSSELS SPROUTS.

Improved Dwarf—The plant grows almost to two feet high, and produces from the sides of the stalk numerous little sprouts, one or two inches in diameter, resembling cabbage. Pkt. 5c, oz. 15c, ½ lb. $1.00.

BROCCOLI. Early Purple Cape—Produces large heads of a brownish purple color, very close and compact, and of excellent flavor. Pkt. 10c, oz. 30c, ½ lb. $1.60.
CARROTS.

Sow 1 oz. to 200 ft. of Drill, 2 lbs. to the acre. Sow all kinds of seeds with Everitt’s Man-Weight Drill.

EARLY FRENCH FORCING—The earliest variety, large grown for forcing purposes; globe shaped, root of an orange red color. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. $1.00.

HALF-LONG SCARLET NANTES—Tops medium; roots cylindrical, smooth, bright orange; flesh orange, becoming yellow in center, but with no distinct core; of the finest quality. This and the preceding are the varieties so extensively used in France for culinary purposes, and only need to be known to supersede the coarser sorts for garden culture. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 85c.

EARLY SCARLET HORN—Best for early planting out of 10c. Tops small, coarsely divided; roots top shaped, surface dented, skin orange red. Pkt. 4c, oz. 10c, ¼ lb. 25c, lb. 85c.

OX-HEART—This new carrot comes from France. It is intermediate in length between the half-long varieties and the Short Horn, but much thicker than the latter, attaining at the top, 3 or 4 inches in diameter. It is of fine quality for table use, and deserves general cultivation. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00.

NEW CHANTENAY—This new half-long stump-rooted carrot is one of the most productive varieties known, has an extra large shoulder, is easily dug, and is in every way desirable. It is very smooth, fine in texture, and of a beautiful rich orange color. Well worthy of cultivation. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

DANVER’S HALF-LONG ORANGE—A most excellent variety for all soils. It will yield the greatest bulk with smallest length of roots of any variety, 20 to 30 tons being no unusual crop per acre. Pkt. 4c, oz. 10c, ¼ lb. 25c, lb. 85c. By express, 75c per pound.

RED SAINT VALLERY—A large, beautiful Carrot, of a rich, deep orange-red color. The roots grow very straight and smooth, from ten to twelve inches long. Very fine quality for table use, and very productive. Pkt. 4c, oz. 10c, ¼ lb. 25c, lb. 85c.

Large White Belgian—Grows one-third out of the ground; immense yielder; large size; easily gathered; very suitable for stock. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 75c. By express, 65c per pound.

IMPROVED LONG ORANGE—Long roots, good yielder. Good for table or stock. We offer the best and finest variety. Pkt. 4c, oz. 8c, ¼ lb. 25c, lb. 85c. By express at 75c per lb.

GIANT VICTORIA—This is the Goliath among the carrot family. Under rich manuring it will grow to be nearly the size of an average Mangoldwurzel. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c. By express at 75c per lb.

ENDIVE.

Green Curled—Not only most useful as a salad, but it is highly ornamental from its delicately cut and colored leaves. It is much used for garnishing. (See cut.) Pkt. 5c, oz. 15c, ¼ lb. 50c.

Broad Leaved Batavia—Chiefly used for flavoring. Price the same as above.

CRESS OR PEPPER GRASS—Sow early in spring, very thickly in shallow drills. The sowing should be repeated every week, as it soon runs to seed. Used as a small salad. Extra cured. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

WATER CRESS—True. Pkt. 10c, oz. 25c, ¼ lb. 75c.

CHICORY, Large Rooted or Coffee—Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00.

COLLARDS—A variety of cabbage. Pkt. 5c, oz. 15c, ¼ lb. 30c, lb. $1.00.

CORN SALAD—Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 85c.

Odds

FACTS

FARMERS and Gardeners have so often been disappointed in seeds, potatoes and grain, from which they expected great things, and with good reason, that they hesitate to invest in anything new, and often allow a really valuable article to pass. A well-established house can not afford to trifle with their customers in this way, and the best guarantee of our course in the future is our record in the past. Before we offer a new article we go to the trouble to ascertain that it is strictly O. K., and we point with pride to the many choice varieties of vegetables, grain, potatoes, etc., of our introduction that are now in general cultivation.
WHITE PLUME SELF-BLANCHING

A PAGE OF THE BEST VARIETIES OF CELERY.

EUREKA SELF-BLANCHING, Our Great Specialty.

The best variety of self-blanching celery in existence. With the Eureka Self-Blanching, choice blanched celery can be raised as easily as a head of cabbage or lettuce. And this variety will keep far into the winter. Stalks beautiful in appearance, dwarf, compact in growth, and very solid; color of outer leaves cream, tinted with green; stalks and inner leaves creamy white; ribs very crisp, tender, and of the most superior flavor.

Pkt. 10c., 6 pkts. 50c., oz. 75c.

GOLDEN SELF-BLANCHING—A remarkably stocky and strong growing variety; solid and delicious flavor, self-blanching and a good keeper. One of the very best for early market. Pkt. 1 c., 3 pkts. 25c., oz. 40c.

WHITE PLUME—Each year adds to the popularity of this variety. Many market gardeners now plant their entire crop of it. The heart and stalk is naturally white, and consequently requires very little earthing. Eating qualities are the very best; will not keep late in the winter.

Pkt. 5c., oz. 25c., lb. 75c.

KALAMAZOO BROAD-RIBBED—A distinct variety, its broad ribs, thick and closely set are solid, crisp, and of fine flavor. Grows rapidly, and by reason of its neat and compact growth and showy appearance, makes a grand market variety. 1 lb. 5c., oz. 25c., lb. 75c.

NEW ROSE—The red or rose celery are better in many respects than the white. They are more solid, hence keep better, and have to a greater degree that nutty flavor so desirable in celery. Red Rose is best colored celery. Pkt. 5c., oz. 25c., lb. 75c.

GOLDEN HEART—in quality, appearance and size this variety leaves nothing to be desired.

Pkt. 5c., oz. 20c., lb. 60c., lb. 82.00.

GIANT GOLDEN HEART—Originally produced by a careful selection from the Dwarf Golden Heart by a gardener, who made the need of a critical market his study for years. The quality is fully equal to the original stock, and in habit of growth is taller than its parent; the stalks are very thick, perfectly solid, of excellent flavor and unexcelled as a long keeper. It is one of the best Celeries for winter storage, for market or for the private planter.

Pkt. 10c., oz. 25c., lb. 75c.

PERFECTION HARTWELL—The best flavored, most crisp and tender of the white varieties; the stalks are medium size, round, very solid, crisp and tender; fine nutty flavor.

Pkt. 5c., oz. 25c., lb. 75c., lb. 82.50.

Boston Market—A very superior market variety; much esteemed for family and market use, a good keeper.

Pkt. 5c., oz. 20c., lb. 60c., lb. 82.90.

CRAWFORD'S HALF DWARF—Early, solid: of vigorous growth, and nutty flavor; very ornamental.

Pkt. 5c., oz. 20c., lb. 60c., lb. 82.00.

GIANT PASCAL—It excels in flavor, and is free from any bitter taste. The ribs are the largest of all, thick, hard, solid, stringless, and of beautiful waxy appearance.

Pkt. 10c., oz. 25c., lb. 75c.

Celeriac—Turnip rooted celery. Pkt. 5c., oz. 20c.
POPCORN

Plant Popcorn in hills with EVERITT'S MAN-WEIGHT DRILL and Cultivate the crop with EVERITT'S MAN-WEIGHT CULTIVATOR.

Plant 1 lb. for 250 Hills.

MAPLEDALE PROLIFIC—A most profitable variety, bearing as high as 18 good ears on one stalk, but we find 4 to six ears a good average. Besides its prolific character, the quality of the corn is superior. Ears 6 to 7 inches long, pure white grained, and pops large, pure white, and tender. Pkt. 5c, lb. 25c, 4 lbs. 85c, by mail; by express or freight, 8c per lb.

QUEEN'S GOLDEN—The handsomest of all pop corns. Large ears, golden yellow grains. A great yielder and extremely tender when popped. We have a very large trade in this variety. Pkt. 5c, lb. 25c, 4 lbs. 85c, by mail; by express or freight, 8c per lb.

SILVER LACE—Grows 5 to 6 feet high, very productive, producing three to four perfect ears on a stalk. The ears are very handsome, 5 to 6 inches long and always filled out to the end with smooth, round, metallic, white grains. Superior quality when popped. Pkt. 5c, lb. 25c, 4 lbs. 85c, by express, 8c per lb.

WHITE RICE—The standard market variety. Pkt. 5c, lb. 25c, 4 lbs. 75c, by mail; 5c lb. by freight or express.

SNOW BALL—Very like the flakes of snow falling as it pops and like a pile of pure white snow as it lies in a heap. Tender, rich, melting. You can not desire more in quality. Early and productive. Pkt. 5c, lb. 35c by mail; by express or freight, 15c per lb.

BOYS' FAVORITE—Quite a novel sort; grows of many different colors. All growing on the same ear. The quality is superior. Very yieldly. You should grow a few hills of this, sure. Pkt. 10c, ½ lb. 30c.

GOURDS

The following varieties will be found very useful about every house. Start the seed early and transplant.

NEST EGG—They exactly resemble the eggs of hens, and are very useful as nest eggs, never breaking or freezing, and are never injured by wet. By using them many eggs can be saved. The plant grows very rapidly, and is useful in covering unsightly places, being quite ornamental. Pkt. 10c, oz. 35c.

DIPPER—This variety makes a splendid tool for dipping hot liquids. The handles do not heat through. Pkt. 10c, oz. 25c.

DWARF BUSH—Makes an admirable vegetable dishcloth. The peculiar lining is the part used, which is sponge-like, porous, very tough and elastic. The vines are very ornamental. Pkt. 10c, oz. 40c.

EGG PLANT

NEW PEARL WHITE—This great novelty resembles the New York Purple in shape, but is pure white and often times exceeds that popular variety in size. It is unequalled by any other sort in productiveness and of superior table qualities; fruits very early. Pkt. 10c, 3 for 25c, oz. 50c.

NEW YORK IMPROVED LARGE PURPLE—The leading variety grown by marketmen everywhere; fruit large, smooth and deep purple; flesh white and of good quality. Pkt. 10c, oz. 30c, ½ lb. $1.00, lb. $3.50.

Early Purple—Harder and earlier than the New York Purple, succeeding further north. Fruit from 6 to 9 inches long. Dark purple, good quality; one of the best varieties. Pkt. 5c, oz. 20c, ½ lb. 75c, lb. $1.00.

Extra Early Dwarf Round Purple—Same in general appearance to New York Purple, but smaller. Its great merit is its hardness and extra earliness, hence it is valuable for northern sections. Pkt. 10c, oz. 25c, ½ lb. 85c, lb. $3.00.

BORECOLE OR KALE

DWARF GREEN CURLLED GERMAN—A dwarf variety, rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter. The leaves are beautifully curled and of a bright green. Very hardy. It is most tender after being bitten by a sharp frost. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 85c.

GERMAN DWARF GREEN—A variety having large, moderately frilled leaves covered with a dense bloom. It is popular in the South, where it grows all winter without protection and is also planted largely in the north, where it is known as "Sprouts" or "Siberian Kale." Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 85c.

Cottage—A variety of great favor; an immense cropper. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. $1.00.
Sweet Corn.

PLANT YOUR SWEET CORN in HILLS or DRILLS with EVERITT'S MAN-WEIGHT DRILL.

1 bu. will plant about 6 acres, 1 qt. about 500 hills.

We quote pints and quarts of Sweet Corn by mail, pre-paid. If to be sent by freight or express, deduct 5¢ per pt. 10c per qt.

PRICE—We sell all kinds of Sweet Corn, unless otherwise quoted, as follows: By mail, post paid, pkt. 5c, pt. 30c, qt. 30c; by freight or express, peck $1.00, bu. $3.00, 2 bu. or more at $2.75 per bu.

Extra Early Adams—The earliest White Corn grown; ready for use in 60 days; used extensively wherever introduced. Can be planted earlier than the sugar varieties.

Early Adam—Similar to above, but larger and not quite so early.

RED COB CORY—Ears are very handsome, sweet and fine quality. "Planted last of April, on July 7 marketed 7,000 dozen at 30c." How is that for profit? It is the earliest of all the sugar varieties. TWO CROY'S CAN BE RAISED ON THE SAME GROUND IN ONE SEASON.

WHITE CORY—Same as above, except cob and grains are pure white; a great advantage. Pkt. 10c, pt. 25c, qt. 40c, peck $1.25.

CROSBY'S EARLY SUGAR—Early and a great favorite in the markets of all the large cities. It forms rather small ears, but is productive and of excellent quality.

PERRY HYBRID—A new extra early variety with large, fine ears, about the size of Minnesota, twelve rows and fine quality.

EARLY MINNESOTA—A well-known early dwarf variety; ears fine size and excellent quality.

COUNTRY GENTLEMAN—This is pre-eminent an epicure variety, being the sweetest and most tender of all. The ears are medium, cob small, kernels of extraordinary depth, nearly white, and irregularly crowded together on the cob. It is very productive, bearing 2 to 4 ears to the stalk; matures medium to late. Pkt. 5c, pt. 25c, qt. 40c, peck $1.25.

EGYPTIAN—One of the best late varieties and certainly the handsomest of all the late sorts. Ears large, more uniform, and excel all in filling out perfectly at the tip end. Cob and grain pure white. Very productive and used extensively for canning purposes.

NEW CHAMPION—The finest, large, extra early in cultivation. See novelties for particulars and prices.

NONE-SUCH—This new variety will please a lover of delicious, meaty Sweet Corn, and will suit the most exacting customer. Medium early, coming in after the second early, of extra strong growth, stalks and cobs of a beautiful plump color, grain white, ears large, 12 to 14 rowsed, wonderfully productive. Pkt. 5c, pt. 25c, qt. 40c, peck $1.25.

STOWELL'S EVERGREEN—Grown more extensively than any other variety, being a great favorite with canners and market gardeners for late use. The ears are of large size, kernels very deep, tender and sugary; very productive, and remains a long time in fit condition for table use.

EVERITT'S EXCELSIOR—Ripens early; has large 12 to 18-rowed ears and deep grains. One of the largest varieties grown, and one of the very finest. For home use and choice market trade, it is unsurpassed.

EARLY MAM-MOTH—This variety produces the largest ears of any sort with which we are acquainted, a single ear sometimes weighing 3 or 4 pounds. It is of excellent quality, sweet, tender and delicious and its only fault (if this can be considered one) is the immense size of the ear.

BLACK MEXICAN—Although the ripe grain is bluish-black, the corn, when in condition for the table cooks remarkably white, and is surpassed by none in tenderness. This, by many, is considered the most desirable for family use of the second early sorts.
GIANT PERA—A variety remarkable for its great size, often attaining a length of 18 inches and 16 inches in circumference. Notwithstanding this immense size, their quality is excellent. They are fit to eat at all stages of their growth, even when full grown, and are free from the green cucumber taste. Pkt. 10c. 3 lbs. for 25c, oz. 20c, ¼ lb. 50c, $1.50.

Gherkins—Very small and prickly fruit, used expressly for pickling. Pkt. 5c, oz. 20c.

PARISIAN PROLIFIC PICKLING—This new French sort is a great acquisition. The fruit is very long, slender, cylindrical, densely covered with fine prickles, and deep, rich green in color. The flesh is very crisp and tender, making it one of the best for slicing, as well as for pickles. Enormously productive. Pkt. 10c, oz. 20c, ¼ lb. 65c.

NICHOLS’ MEDIUM GREEN—Very thick through, full at both ends, handsome in appearance, and of fine quality. The vines are vigorous in growth, and very productive.

WESTERFIELD'S CHICAGO PICKLING—Very popular with Chicago market gardeners, and extensively grown in that vicinity. Fruit, medium length, pointed at each end, with very large and prominent spines; color, deep green.

GREEN PROLIFIC OR BOSTON PICKLING—A very prolific variety of fine qualities. With good culture 200,000 can be raised on an acre.

EVERGREEN—One of the handsomest and most valuable. The fruit remain a long time in prime condition. It is an everbearing sort and wonderfully prolific.

IMPROVED EARLY WHITE SPINE—Vines vigorous, fruiting early and abundantly; fruit straight and handsome, light green with a few white spines.

EARLY FRAME—A standard early sort for the table and pickles. Vigorous growth and productive.

EARLY GREEN CLUSTER—A short, prickly variety, bearing in clusters near the root. It is a great bearer and matures early.

IMPROVED LONG GREEN—Forms fruit for the table nearly as early as the shorter sort, about 12 inches long, firm and crisp, with very few seeds. The young fruit makes one of the best of pickles.

ARLINGTON WHITE SPINE—The young fruits are unusually crisp and tender, and are of a very dark green color, so that the variety is considered by many to be the best for small pickles.

Snake—This cucumber grows sometimes to the length of six feet, curled up like a snake. Pkt. 10c.

NEW EVERBEARING—Of small size, very early, enormously productive and valuable as a green picker. Vines exhibit at the same time cucumbers in every stage of growth, the small ones being perfect in shape, of a fine green color and just the size for pickling.

O. K. PERFECT PICKLING—Certainly one of the finest pickling cucumbers in the market. Early and a great bearer, well formed, firm and crisp.

Early Russian—The earliest of all; small size.
A DOZEN FINE VARIETIES OF

TENNIS BALL.—A fine early sort; very hardy. One of the best for forcing under glass or early planting outdoor. Heads are small, but extremely solid. Pkt. 4c, oz. 10c, ½ lb. 30c, lb. $1.00.

EVERLASTING.—Every gardener knows the importance of having a lettuce that is slow to run to seed. This sort excels all others in this respect. It will remain almost all summer in prime condition. It is early and remarkable for the size of its head. Particularly do we urge market gardeners to grow it, and it will put money in their purses, as no variety will bring more money nor produce a more permanent crop. Pkt. 10c, 3 pkt. 25c, oz. 30c, ¼ lb. 75c, lb. $2.50.

New York.—Heads almost as solid as an early summer cabbage, which in general form it somewhat resembles. It blanches itself naturally, tender and of excellent flavor, and entirely free from bitterness. Pkt. 4c, oz. 10c, ½ lb. 30c, lb. $1.00.

IMPROVED HANSON.—The finest strain of this popular variety in the country is what we offer. Our seeds will produce mammoth heads almost as solid as cabbage, delicious, sweet, crisp and tender. Stands drought and scorching heat better than many others. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. $1.00.

BLACK SEEDED SIMPSON.—Grows fully double the size of the Early Seeds Simpson, and is better in every way. It is much lighter colored, leaves being almost white. Stands summer heat splendidly. Pkt. 5c, oz. 10c, ½ lb. 40c, lb. $1.50.

CALIFORNIA ALL-HEART.—Its handsome shape and appearance are well shown in the engraving. It heads up like a cabbage and almost as solid, of a beautiful light green shade, almost white, and a very rich flavor. Grows rapidly and is tender and sweet. Pkt. 5c, oz. 20c, ½ lb. 75c.

TILTON’S WHITE STAR (SEED WHITE)—Of the Black Seeded Simpson type, but grows larger and more rapidly; blanches perfectly and is of excellent quality. The plants remain long in condition for use before running to seed, and owing to the thick leaf keep long after cutting without wilting. For forcing and early planting out doors, this is a decided improvement over other varieties of this class for either purpose. Pkt. 10c, oz. 20c, ½ lb. 50c, lb. $1.50.

GRAND RAPIDS.—This variety originated at Grand Rapids, Mich., where it is largely grown for shipment and where it is considered the best loose headed lettuce for forcing under glass. Leaves medium size, of light, yellowish green color, much crimped, and frilled, thin, but of very upright growth; forms a fair sized loose head, handsome, tender and of good quality. Will stand without spoiling a week to ten days after it is cut to cut. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.50.

BUTTERCUP.—For beauty of foliage, extreme tenderness and delicacy of flavor, it is hard to beat. Always forms good solid heads. It is one of the best of all the new varieties. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. $1.50.

DENVER MARKET.—An early variety of Head Lettuce, either for forcing or open ground. It forms large, solid heads of a light green color, and is very slow to go to seed. The leaves are crisp and tender, and of excellent flavor. By these blotted leaves it distinguishes itself from any other kind of lettuce now grown. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.50.

CALIFORNIA CREAM BUTTER.—A distinct variety of cabbage lettuce. It forms round, solid heads, as shown in the illustration. The heads are of a very rich cream-yellow color—most refreshing in appearance, and particularly rich and buttery to the taste. The heads are of good size, compact, very hard and solid. The heads are so solid that generally they have to be cut before any seed stock can make its appearance. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. $1.50.

TOM'HANNOCK.—Entirely distinct from all other existing varieties, and of superlative fine quality. It forms a beautiful plant ten to twelve inches high, grows very quickly, is ready to cut early; remains for weeks of the finest quality. Pkt. 4c, oz. 10c, ½ lb. 30c, lb. $1.00.

Early Curled Silesia.—The first to produce edible leaves. For forcing and early spring sowing it is very popular. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. $1.00.

The Deacon.—Forms large and very solid heads, of attractive green color, very crisp, tender and of first-rate quality. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. $1.25.

“ALL SUMMER LETTUCE”—One dozen varieties mixed. Will give you excellent lettuce all summer from one sowing. Try a packet this season. Large pkt. 10c, oz. 20c, ¼ lb. 50c.

We don’t do half the seed business of the country as a little concern near here claims they do, but we do ten times as much business as any other seed house in this city.
SWEET DELICIOUS MUSK MELONS.

One Pkt. each of 10 choice varieties of Melons illustrated on this page for 45c.

EXTRA EARLY HACKENSAK—Ten days earlier than the old Hackensak, which fact enables growers to put them on the market when they will bring double the price obtained for the old sort. They grow large, round-shape, flattened at both ends, skin and flesh green, of rich sugary flavor. Pkt. 4c, oz. 10c, ½ lb. 25c, lb. 75c.

IMPROVED MONTREAL—A magnificent musk melon. The fruit is round and flattened as is shown in the illustration, deeply and regularly ribbed, skin and flesh green; densely netted; extremely thick flesh of exquisite flavor. Frequently grow to weigh more than 30 lbs. Pkt. 4c, oz. 10c, ½ lb. 20c, lb. 75c.

DELMONICO—The shape and appearance of this new melon is well depicted in the illustration. The flesh is of a beautiful orange pink, and for quality is among the very best. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 75c.

CHRISTOPHER COLUMBUS—An absolutely distinct variety. The large size and peculiar external appearance so remarkably distinct from any other sort, in connection with its extraordinary fine eating quality, which excels all others, and its fine grained and thick flesh proclaims it a popular favorite wherever introduced. Flesh green, Size convenient for market. Medium early. A splendid shipper. Pkt. 10c, oz. 20c, ¼ lb. 50c, lb. $1.25.

OSAGE—Extensively grown for hotel trade. Medium size, is egg-shaped. The skin is very thin, dark green color, slightly netted; flesh salmon color, remarkably sweet and spicy. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

BANQUET—Of medium size, flat at both ends. In quality has no superior. The flesh is uniformly deep and of that granulated character that always indicates a good melon; color, a dark rich salmon. Pkt. 5c, oz. 15c, ¼ lb. 30c.

O.K. NETTED GEM—See Novelties and Specialties.
MUSK MELONS (Continued.)

Bay View—With ordinary culture the Bay View will grow to weigh from 10 to 15 lbs., while with extra cultivation it will weigh from 17 to 20 lbs., with a length from 16 to 18 inches. Light green, flesh very thick, luscious and sweet. Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 75c.

Cassaba—Very large, oblong, netted skin, excellent flavor. Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 60c.

Ace, or Baltimore—Very productive, oblong musk melon, that is quite popular in the Baltimore market. The fruit resembles the Bay View, but are more pointed at the ends. Of large size, ribbed, and heavily netted. A good shipper. Flesh quite thick, light green and of good quality. Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 75c.

Jenny Lind—Small size, but of best quality; season early. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 65c.

Proliic Nutmeg—Large growth, fine form, skin and flesh green; very delicious. Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 75c.

Christiana—One of the most delicious and quickest growing of all melons, only adapted, however, to the family garden, as it must be eaten just as it falls from the vine of its own accord. Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 75c.

EMERALD GEM—About the size of O.K. Netted Gem but the skin is smooth and of a deep green color. Flesh salmon, very thick, quality superb, vines hardy and thrifty, yielding heavy crops. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 75c.

KOHLS RABI.

Early White Vienna—Very early, small, handsome, white bulbs. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25.

Early Purple Vienna—Identical with former, except in color. Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.50.

LEEK.

Large London—A large strong plant, with broad leaves. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25.

MUSTARD.

Black or Brown—Pkt. 5c, oz. 10c, lb. 45c.

White—Best for salad or culinary purposes. Pkt. 5c, ¼ lb. 15c, lb. 45c.

NEW CHINESE—Highly esteemed for salads, particularly in the south. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

NASTURTIUM.

Culture—Sow after the ground is warm, in drills one inch deep, by the side of the fence, trellis, or some other support, to climb upon. They will thrive in good ground in almost any situation, but are more productive in a light soil.

TALL MIXED—Both ornamental and useful. Its beautiful orange colored flowers serve as a garnish for dishes, and the young leaves are excellent for salads. The flower buds are easily formed, and the green seed pods preserved in vinegar, make a pickle greatly esteemed. Pkt. 5c, oz. 30c.

GIANT VESUVIUS ONION.

This new Giant Italian Onion is one of the most beautiful of the many fine sorts from that country. The bulbs are of a handsome globe-shape, and grow to weigh 2 to 3 lbs. each, the first year from seed. Skin red; flesh white; flavor mild and sweet. A great novelty that our friends should not fail to plant. Pkt. 10c, 3 for 25c, oz. 25c, ¼ lb. 75c, lb. $2.50.

WATER MELON See Additional Varieties next page.

Gypsy, or Georgia Battlesnake—A superior early market variety; large, oblong; skin green mottled and striped. Pkt. 4c, oz. 10c, ¼ lb. 25c, lb. 75c.

Black Spanish—Medium size, round, color very dark, flesh very rich and sugary. Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 75c.

Cuban Queen—Flesh bright red, luscious, crisp and sugary. An excellent keeper, and bears transit to distant markets well. Their great size, handsome appearance, thin rind, red flesh and delicious taste are captivating. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c, 2 lbs. or more by express at 65c per lb.

Mammoth Iron Clad—One of the largest varieties known. With ordinary cultivation many melons weigh 60 to 70 lbs. each. They have frequently been dropped 3 feet and even from the shoulder of a man without bursting or showing any breakage. They keep in fine condition for one month after being ripe. The heart is very large. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, 2 lbs. or more by express at 65c.

Vick's Early—This melon is highly prized for its extra earliness. Oblong in shape, smooth, size medium, flesh bright pink, solid and sweet. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

Early California—Very large size, light green color, thin but tough rind, an excellent market variety almost equal to Lee Cream; fine flavor. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 75c.

Light Iceberg—Fruit medium size, round, very light green in color or white. The flesh is yellowish, delicate, very thin, juicy and tender. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

INDIANA SWEETHEART WATER MELON—The most valuable variety of all. Don't fail to include it on your order. See Novelties and Specialties.

---

"O. K. Seeds are the best I ever used. Send catalogue as soon as possible." R. P. PARKER, Emory, Tex.

"Mortgage lifter Corn is a good dry weather corn. It is the best I have and is a good yielder." CLAY LEMON, Petersburg, Ind.

(The Mortgage lifter Corn is the best we ever saw for dry weather. Everts.)

"O. K. Seeds received and found to be good. I saw well pleased with all of the seeds. I saved $7.51 by ordering my seeds of you." C. J. BAYLER, Independence, W. Va.

"O. K. Seeds all did well. Corn the largest grown in this country. Tomatoes 2 to 3 lbs. each, Water Melons 27 to 38 lbs." NOAH W. HOBBS, Haltson, Va.
GREEN AND GOLD—Green without gold within. The melons grow to a good size, range from 25 to 45 lbs., in weight, and in productivity equal any of the red-fleshed sorts, while in delicious flavor is unsurpassed. Pkt. 5c; oz. 10c, ¼ lb. 25c, lb. 50c.

SEMINOLE—Extra early, enormously productive, large and of most delicious flavor. It is of two distinct colors, gray and light green. Melons of best colors and exactly the same in size, shape and quality are found on the same vine. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 50c.

EVERITT’S WHITE QUEEN—This is the largest and finest white melon ever introduced and the handsomest of all. Quality is very fine and equal to the best melon grown. The rind is hard and tough, making it a splendid shipper. Grows to weigh 25 to 40 lbs. and are very productive, almost covering the ground. Red flesh, sweet, juicy, melting. Pkt. 10c, oz. 20c, ¼ lb. 50c, lb. 1.50.

PEERLESS OR ICE CREAM—Medium size, nearly round, pale green, thin rind, flesh scarlet and solid, seeds white, flavor of the very best. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

HOOSIER KING—This magnificent melon was produced in Indiana by a large melon grower by hybridization and careful selection, until he produced a melon that controlled the market. For years he had been growing them on his farm and shipping them to the Indianapolis market, much to his own profit and to the annoyance of other shippers, as his melons were sought after by retailers and consumers in preference to any others. Read what Mr. Reese has to say about the Hoosier King:

"The Hoosier King is the finest, largest and best quality melon that comes into this market. They arrive in better condition, are uniformly larger size and sell for more money than any other variety; besides the consum-

er who once tries them will have no other.”

R. H. REESE, Commission Merchant, Ind’p’lis, Ind.

The skin is beautifully striped, being two shades of green, light and dark, seeds black, flesh brilliant red, solid, rich, sweet and luscious; skin thin and tough. They will stand very rough handling. Size, large to very large. Melons of 60 pounds weight can be easily raised. Every melon-grown will find Hoosier King fully equal to our recommendation. Pkt. 5c, oz. 10c, ¼ lb. 50c, per lb. $1.50.

FLORIDA FAVORITE—This new variety is of medium size, very prolific, and unexcelled as a table variety. The rind is too thin and crisp to make it a long-distance shipping melon, but for home use or near-at-home markets it will give great satisfaction. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

DIXIE—This superb watermelon has taken the market by storm wherever introduced. The vines grow strong and rapidly, with more laterals than any other melon, and have the singular and very valuable quality of rooting from every joint, adding greatly to the productivity and life of the vines. The meat is fine and of superior quality. Very early; thin, hard rind, keeps unusually long before showing decay. One of the best, and the melon-grower who plants largely of DIXIES, plants wisely. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 81.

KOHL’S GEM—An excellent shipping variety. It has a very tough rind and carries in good condition. The flesh is bright red and of good flavor. The melons grow to a fair market size, from 20 to 50 lbs. each in weight. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c.

COLORADO PRESERVING—An improvement on the green preserving melon; enormously productive and of better quality, and making very clear, transparent preserves of fine flavor. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

WATERMELONS
NEW CROP CHOICE ONION SEED.

OUR 3 GREAT GENUINE PRIZE TAKERS

GENUINE PRIZE TAKER—Every person who visits our large cities has, without a doubt, noticed the large, beautiful Onions offered for sale at the stands every fall. These Onions were originally imported, but since the introduction of this famous variety there is getting to be less need of the imported stock, and the demand is being filled by American grown Prize-Takers. They are of a beautiful rich straw color, and grow to enormous size, averaging twelve to fourteen inches in circumference, and under favorable circumstances attain a weight of five pounds the first year from the seed, although of such great size, they are firm and excellent keepers, keeping all winter and in the spring are al-

most as fresh and sound as when put away. Of the mildest flavor, are often times eaten as an apple. They have a very small neck, perfect globe shape. On market they always attract attention, and bring two or three times the price of ordinary Onions of any other color. They are wonderfully productive and can be grown by any person.

"Orchard and Garden" says: "The finest we have ever raised. The one of beauty and perfection, and undoubtedly will become the most popular yellow Onion in cultivation."

"Popular Gardening" says: "Among the score or more of fine sorts of Onions none can hold a candle to Prize-Taker. Our specimens were the finest onions we ever raised. The smallest bulb weighed over a half pound each, and the yield was at the rate of over 1,000 bushels per acre. No other variety can successfully compete with the Prize-Taker."

PRICE—Pkt. 10c, 3 for 25c, oz. 25c, 1/2 lb. 75c, lb. $2.75.

YELLOW GLOBE DANVERS. 600 to 800 Bu. per Acre. An Ordinary Crop from our Seed.

This magnificent sort can not be too highly recommended. It is more extensively grown than any other variety. 600 bus. per acre is an ordinary crop under favorable conditions, while 800 bus. per acre can be grown by a skillful cultivator from seed sown in the spring. We offer but one variety of Danver's Onion and that is the best. For reliability in bottoming our strain is unsurpassed. Bulbs are very handsome, round, of good size, with thin, straw-colored skin; flesh white, fine grained, firm, and excellent quality. It ripens early, keeps well and sells readily at the highest price. Our Yellow Globe Danvers is all that can be desired as a market and table Onion. We sell seed in 100 lb. lots to individual growers year after year. Pkt. 5c, oz. 18c, 1/2 lb. 50c, lb. $1.50.

LARGE RED WETHERSFIELD. 600 to 800 Bu. per Acre. An Ordinary Crop from our Seed.

It is oftentimes a matter of choice of color what Onion is grown. To those growers who prefer a red variety we recommend our large Red Wethersfield. This is also one of our greatest specialties, and next to Yellow Globe Danvers we sell the largest quantity of seed of it. It is the most reliable Red Onion grown for general purposes. It yields constantly from 600 to 800 bus. per acre, and is a most reliable cropper even under unfavorable conditions. Large size, purplish-red skin, flesh purplish-white, firm round, flattened, fine grained, moderately strong flavor. The best keeper. Especially adapted to poor and dry soils. Pkt. 5c, oz. 20c, 1/2 lb. 60c, lb. $2.00.

SHORT CROP. Some other houses will tell you that the crops of Onion Seed were very short this year and they will ask you fancy prices. While it is true many plantings were an entire failure, yet our crops were fine and we have a full yield. Our prices are correspondingly moderate. A failure to realize a good yield of Onion Seed may be attributable to inferior bulbs planted. Our seed is grown from selected hand-picked bulbs.

(32)
Italian Onions.

All of the varieties grow very rapidly from seed, and are sweeter and of more delicate flavor than our American onions; bulbs of the most beautiful shape and color. While we advise growers to devote their main crop to the American varieties, yet we recommend them to vary it by planting a part of the Italians. We recommend them highly for summer and autumn use in the family, while if marketed they command fancy prices.

**Giant Rocca or Naples.** One of the best known of the Italian onions in this country. Quite extensively grown in some sections, where they produce immense crops; single bulbs weighing ½ to 2 pounds each. Flavor very mild and delicate; color, light brown; flesh, white; very handsome; globular shape; a good keeper. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. $1.75.

**Mammoth Silver King.** This is unequal to the largest and most beautiful onions in the world. Single specimens have weighed as much as 5½ pounds. No other onion excels in mild and delicate flavor, or has a more handsome and beautiful silvery white appearance. So mild are they in taste that they can be eaten raw like an apple. They always command a high price in the market. Pkt. 10c, oz. 25c, ½ lb. 75c, lb. $2.50.

**Spanish King.** The outside skin is of a rich, yellow straw color, while the flesh is white, sweet, mild and tender. They bottom well, are free from stilt necks, and have produced more bushels (1,157) marketable onions to the acre than any other variety known. Very rapid growth and matures early. In market it attracts marked attention. Pkt. 10c, oz. 25c, ½ lb. 75c, lb. $2.50.

**Giant White Italian Tripoli.** Of large size and most beautiful form, with fine white skin. The first season from the black seed, it will grow an onion from 1 to 1½ pound, but to attain the full size seed should be started in a hot bed and transplanted. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. $1.50.

**American Extra Early Pearl.** This remarkable onion is one of the earliest and in great size, thickness, rapid growth, bottoming and keeping qualities, it is scarcely excelled. It grows quickly to an enormous size, of pearly white color, the outer skin having a most showy, waxy appearance, flesh of a pure snow white, and flavor so mild that it can be eaten like an apple. This onion has the valuable quality of resisting northern winters. Sow the seed in the spring, thickly, and raise sets. These can be set out in September or October, and early in May the onions are as large as hen’s eggs. Pkt. 10c, oz. 30c, ¼ lb. 75c, lb. $3.50.

**AMERICAN VARIETIES OF ONION SEED—Continued.**

**LARGE RED GLOBE.** This is a very handsome variety, and is deserving of general cultivation. It matures quite early; grows to a large size; skin deep red; flesh fine grained, mild and tender. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.25, 3 lbs. or more by express at $2.00.

**WHITE GLOBE.** A large globe-shaped onion; firm, fine grained of mild flavor; keeps well. This is one of the handsomest onions grown, of beautiful shape, clear, white skin, and commands the highest market price. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.50, post paid by mail.

**SOUTHPORT LARGE YELLOW GLOBE.** This new variety is entirely distinct from the Danvers. It is a very handsome, round or globe-shaped variety, of large size, with thin yellow skin, white flesh, fine grained, mild, very firm, and the best of keepers. It ripens early and sells readily at the highest prices in our markets. It is a most reliable variety for bottoming, and entirely free from scallions. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00, 5 lbs. and over by express, $1.85.

**WHITE SILVERSKIN, or WHITE PORTUGAL.** Very desirable for family use; flavor mild and pleasant; skin silvery white; of handsome appearance; highly esteemed for pickling when young, also for market in early winter. Extensively planted for White Onion Sets. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.75.

**EXTRA EARLY RED.** Very early, medium size, deep red color. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. $1.50, 3 lbs. or over by express at $1.35 per lb.

**EXTRA EARLY WHITE BARETTA.** Without doubt the very earliest onion in cultivation. Pure white color, very mild and delicate flavor. For table use and pickling it is most valuable. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.50.

**WHITE QUEEN.** A small very early variety. In season very early. The quality is excellent, being very mild. Pure white outside and inside. Can be sown from February to July. Largely grown for pickling. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. $1.50.
Prices of packets, pints and quarts include postage. If sent by freight or express deduct 8c. per pint, 15c. per quart from prices named.

Varieties marked * are wrinkled.

SECOND EARLY SORTS.

HORSEFORD’S MARKET GARDEN—A most excellent second early pea, particularly suited for the market garden on account of its great productiveness as well as good quality. It grows about two feet high, very stocky and requires no sticks. Pkt. 5c, pt. 25c, qt. 45c, 3/4 bu. $1.75, bu. $6.50.

*SATISFACTION—This delicious pea is fast gaining in popularity, and many of our customers are now placing their main reliance on them and consider them superior to any other for fine table qualities. The vine grows vigorously to the height of about 2 1/2 feet, requiring no brush or sticks to hold them up, being very stocky and robust, and literally filled with large showy pods, which almost hide their foliage. They continue in bearing longer than any other early sort. The peas when green are unusually large; when dry are much more wrinkled than any other sort. Satisfaction has come to stay. Pkt. 10c, pt. 30c, qt. 50c, post paid. 3 qts. $1.00 by freight or express.

*NEW ABUNDANCE—This new variety is the most prolific known. Plant, half dwarf, 15 to 18 inches high; foliage, large, thick, full and dark green. Pods, 3 to 4 1/2 inches long, roundish and well-filled, containing six to eight large wrinkled peas of excellent quality. Pkt. 5c, pt. 25c, qt. 40c, peck $1.25, bu. $4.75.

LATE SORTS.

*PRIDE OF THE MARKET—Requires no sticks and are quite unequalled in productiveness. Robust, free-branching habit 18 to 20 inches high, and are immensely productive. The pods are so large in size and handsome in appearance that they take high rank for exhibition purposes, and the peas, when on the table, are of so splendid a quality that it would be difficult to over-praise them. Pkt. 5c, pt. 25c, qt. 45c, 3/4 bu. $1.75, bu. $6.50.

BLACK-EYED MARROWFAT—A favorite variety; grows about five feet high; a profuse bearer; pods large and well filled. Pkt. 5c, pt. 20c, qt. 35c, peck 75c, bu. $2.50, 5 bu. $12.00, 10 bu. $25.00.

LARGE WHITE MARROWFAT—A favorite sort. About six feet high. Pods large, broad, and well filled, of excellent quality. Pkt. 5c, pt. 20c, qt. 30c, peck 75c, bu. $2.50, 5 bu. $12.00.

CHAMPION OF ENGLAND—A standard sort, sought after in all markets. Can not be excelled for family use; productive; high flavor; seeds wrinkled. Five feet high. Pkt. 5c, pt. 20c, qt. 35c, peck $1.00, bu. $3.75, 5 bu. $18.00.

*TELEPHONE—A tall wrinkled marrow; very productive; and of the best quality, with large pods containing 7 to 10 very fine flavored peas. Heirloom, about four feet. Pkt. 5c, pt. 25c, qt. 45c, peck $1.75, bu. $6.00.

TALL WHITE SUGAR (Edible pods)—Seeds white. Foliage, light green: a well known variety; height, 3 feet. Pkt. 5c, pt. 25c, qt. 45c, peck $1.75, bu. $7.00.

FIELD PEAS—Used for field culture only. Price, $1.25 per bushel, subject to change.
EVERBEARING PEA.

A variety maturing soon after the Gems, and continuing a long time in bearing. Vine stout, about 18 inches high, bearing at the top 6 to 10 broad pods, each pod containing 6 to 8 large Peas. If these are removed as they mature, and the season and soil are favorable, the plant will throw out from the axil of each leaf, branched bearing pods which will mature in succession, thus prolonging the season on account of its branching habit; they should be planted thinly; a pint of seed planting as much as a quart of other kinds. Peas wrinkled, large, cooking quickly and very tender, superior flavor, remarkable summer and autumn variety everywhere esteemed. Pkt. 10c, pt. 25c, qt. 40c, peck $1.50.

PARSNIPS

1 oz. of Seed to 200 ft. of Drill, 2 to 5 lbs. per acre.

IMPROVED CROWN PARSNIPS—A selection from the Hollow Crown—finer, more symmetrical in shape, more-sugary and tender. A very heavy cropper, smooth, and fine at variety for home or market gardens. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

LONG WHITE—A standard variety of great merit. Pkt. 3c, oz. 10c, ½ lb. 25c, lb. 50c.

PARSLEY

One ounce to 300 feet of Drill.

Fine Curled or Double Parsley—Used principally as a garnish for the table. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

New Fern-Leaved—A new variety; very ornamental in form and coloring. Pkt. 5c, oz. 15c, ½ lb. 40c, lb. 85c.

PEPPERS.

GOLDEN DAWN—A most beautiful golden yellow, making it most elegant in a perrance, either in gr with or for table. In productiveness they stand at the head of the list. The flavor is particularly sweet and mild, and entirely free from any fiery flavor, so much so, that they can be eaten like fruit. Pkt. 5c, oz. 20c, ½ lb. 75c.

PROCOPP'S GIANT—The real giant among all peppers, frequently growing 8 to 9 inches long by 3 inches in diameter. Besides being wonderfully large, they are also beauties; color, a glossy scarlet; flesh, nearly a half inch thick, very tender, mild. Every exhibitor should grow them to a.d to his collection. Pkt. 10c, 3 pktls. 25c, oz. 50c.

RUBY KING—This magnificent Pepper grows 4½ inches long by 3½ to 4 inches broad. When ripe, they are bright ruby red color, remarkably mild and pleasant in flavor, having no fiery taste whatever. Single plants ripen 8 to 15 fruits. Pkt. 5c, oz. 30c, ½ lb. 75c.

LARGE BELL or BULL NOSE—Early, very large, square form, pleasant to the taste, very suitable for filling with cabbage. Pkt. 5c, oz. 20c, ½ lb. 75c, lb. $2.50.

Long Red Cayenne—Bright red color. This is the vegetable that furnishes the Cayenne Pepper of commerce. Pkt. 5c, oz. 20c, ½ lb. 75c, lb. $2.50.

Large Sweet Spanish—Early. Pkt. 5c, oz. 20c, ½ lb. 75c, lb. $2.50.

Monstrous, or Mammoth—Mammoth size. Pkt. 5c, oz. 20c, ½ lb. 75c, lb. $2.50.

LARGE SWEET MOUNTAIN—Very large and excellent for mangos. Pkt. 5c, oz. 20c, ½ lb. 75c, lb. $2.50.

CHINESE CELESTIAL—It is not only a most useful Pepper, but one of the most beautiful plants in existence. Pkt. 10c, 2 for 25c, oz. 50c.

CORAL GEM BOUQUET—Its beautiful little pods ofabin-ing red, are so thickly set as to give it the appearance of a bouquet of corals. Pkt. 10c, 3 for 25c, oz. 50c.
A PAGE OF GOOD PUMPKINS.

1 oz. will plant 40 hills; 5 lbs. per acre. If planted with Corn, 1 to 2 lbs. per acre.

We will sell one pkt. each of the 13 varieties offered for 50c.

1. GENUINE MAMMOTH TRUE POT-IRON—Grows to an enormous size, three feet or more in diameter and 100 to 200 pounds or more in weight. Salmon colored skin, flesh bright yellow, fine grained and of excellent quality. Pkt. 10c, oz. 20c, % lb. 60c, lb. $2.00.

2. MAMMOTH TOURS—A productive French variety, which grows to an immense size, often weighing 100 pounds. Grown for cattie and for table use. We offer the genuine, true article. Seed saved from selected specimens. These seeds have frequently sold at fairs at 10c to 25c each. Pkt. 5c, oz. 10c, % lb. 25c, lb. 85c.

3. MAMMOTH ETAMPS—The skin is a very bright, glossy red, and presents a most handsome appearance, whether for exhibition or on market. Thick-meatcd, flesh very rich in color and of excellent quality. With good cultivation it attains mammoth weights, but in only ordinary soil grows about 2 feet in diameter. It is very productive and a most profitable sort to grow. Pkt. 5c, oz. 15c, % lb. 40c, lb. $1.25.

4. CONNECTICUT FIELD—Large, color yellow. Largely raised for feeding stock. Pkt. 4c, oz. 8c, % lb. 20c, lb. 60c.

5. TENNESSEE SWEET POTATO—Grows to medium size, pear-shaped, a little ribbed, color cream white, sometimes lightly striped with green; flesh white, fine grained, dry and brittle, and of most excellent flavor; very productive and keeps perfectly sound until late in the spring; has no superior for making pies and custards. When cooked it has the appearance of sweet potatoes. Pkt. 5c, oz. 10c, % lb. 25c, lb. 90c.

6. LARGE CHEESE—Superior to most of the field-grown sorts; very hardy and productive. Pkt. 5c, oz. 10c, % lb. 20c, lb. 60c.

7. INDIANA, or KENTUCKY FIELD—This is the best variety we ever saw for raising with corn. Grows to a large size, solid, and is relished by stock; also valuable for pies and canning. Pkt. 4c, oz. 8c, % lb. 20c, lb. 50c, 5 lbs. or more, by express, at 30c per lb.

8. JAPANESE PIE PUMPKIN—This excellent, odd variety comes from Japan, and is largely grown as a choice pie and cooking pumpkin. The illustration shows the exact shape. They ripen early, keep well and are very productive. Flesh is very thick, being nearly solid, fine grained, dry and sweet, having the flavor of sweet potatoes. The seeds are peculiarly marked with Japanese characters, making them quite a novelty. Pkt. 5c, oz. 15c, % lb. 30c, lb. $1.00.

9. GOLDEN MARROW—Shape, round oblong, slightly ribbed. Golden orange color, cooks soft and tender and is the best of keepers; very vigorous growth and immensely productive. Pkt. 4c, oz. 10c, % lb. 20c, lb. 75c.

10. WINTER LUXURY—This new pumpkin, first offered by us last year, is the result of years' careful selection and improvement by a veteran pumpkin-grower, and is pronounced by him and his neighbors the very best pumpkin for pies that they have ever known. It grows uniformly to a diameter of 9 to 10 inches. In color, a beautiful yellow or straw color and very finely and closely netted, like a netted muskmelon. As a winter keeper and cooking variety it stands unequalled. Pkt. 10c, oz. 33c, % lb. $1.25.

11. QUAKER PIE PUMPKIN—A distinct variety from N. Y. State, where it has been grown for many years by a family of Quakers or Friends. The shape is nearly oval, tapering slightly toward the ends. Color, creamy white, both inside and out; flesh is sweet and rich, and an excellent keeper. Pkt. 5c, oz. 10c, % lb. 30c, lb. $1.00.

12. SMALL SWEET SUGAR—Small size, very sweet and sugary. Pkt. 5c, oz. 15c, % lb. 50c.

CASHW—Excellent table qualities; well adapted to Southern States; light cream shell; flesh, salmon color; very productive. Pkt. 5c, oz. 10c, % lb. 20c, lb. 60c.

8. GOLDEN OBLONG—Grows to 20 ft. in length. Shell, rich, golden orange color; flesh, light yellow. Very rich and fine, making the very best pumpkin pies. 14 good pumpkins have been raised on a single vine. Pkt. 5c, oz. 15c, % lb. 30c, lb. $1.00.
Price, unless otherwise quoted, Pkt. 4c, oz. 10c, \( \frac{1}{2} \) lb. 25c, lb. 75c, by mail. By freight or express, 2 lbs. or more of a kind at 65c per lb.

**SHEPHERD**—Another year's trial finds this famous radish still at the head of the list as the best and earliest long radish in existence, and all who have grown them say they are the best long radish in the country. In fine appearance it is unapproached. Exceeds all others in rapid growth, attaining a size of 12 in. in length and 1 1/2 in. in thickness in 30 days from sowing the seed, and will grow 20 inches in length and 3 or 4 inches thick before becoming hard and woody. It is the earliest, the largest, remains tender longest, the handsomest, best for the family, for market, and is good spring, summer and fall. Pkt. 5, oz. 10c, \( \frac{1}{2} \) lb. 25c, lb. 85c.

**WOOD'S EARLY FRAME**—A long, red radish, exceedingly small top; most excellent for forcing.

**IMPROVED EARLY LONG SCARLET SHORT TOP**—Of quick growth; color bright scarlet; long, straight and smooth, crisp and tender.

**LONG WHITE VIENNA**—The finest and most beautiful long white radish in cultivation. Most attractive, straight and smooth, tender, mild flavor, grow quickly. Pkt. 5c, oz. 15c, \( \frac{1}{2} \) lb. 30c, lb. $1.00.

1. **GIANT WHITE STUTTGART**—Very early and of quick growth. Both flesh and skin are pure snowy white. It withstands the severest heat, and grows to an immense size. The quality is always the very finest, firm, brittle and not pithy.

2. **NEWCOM**—This is the earliest, largest, white radish known. Owing to their beautiful half-long shape and fine appearance they readily sell at double the prices of ordinary varieties. Quality very fine.

3. **BRIGHTEST LONG SCARLET, WHITE TIPPED**—Fit for use in 25 days after sowing. Color is the brightest scarlet, except the tails, which are tipped white. This sort outseals any other long red radish that is put in competition with it on the market. Pkt. 5c, oz. 15c, \( \frac{1}{2} \) lb. 30c, lb. $1.00.

5. **IMP. EARLY SCARLET TURNIP**—A decided improvement, both in fairness and brilliancy of color, over the scarlet turnip, and is especially recommended to market gardeners.

6. **EARLY WHITE TURNIP**—Small top, quick of growth; both skin and flesh pure white, crisp and tender.

8. **EARLY SCARLET TURNIP, WHITE TIPPED**—Beautiful scarlet variety, of handsome shape, having a white-tipped tail, or root. Very fine.

9. **WHITE BOX**—Its short top and rapid growth fits it for growing under glass, in frames or boxes, hence its name, as well as for early sowing in the open ground.

10. **EARLY YELLOW SUMMER TURNIP**—Oblong, turnip-shaped and russet-colored sort, grows much larger than the white or red turnip sorts. Best kind for resisting the extreme heat and the drought of the Southern States.

11. **EARLY FRENCH BREAKFAST**—Earliest of all; very tender and beautiful; oval shape; scarlet, tipped with white; great favorite.

12. **SCARLET OLIVE-SHAPED**—Bright scarlet color, and well adapted for either forcing or for early sowing in the garden.

15. **EARLY WHITE OLIVE-SHAPED**—White skin and crisp, white flesh. Is very early.
**RADISHES—Continued.**

14. **LARGE WHITE GLOBE**—A very large round summer turnip radish. Of beautiful form, pure white skin and flesh, which is very crisp and brittle. It grows quickly to a large size, and withstands summer heat.

13. **TWENTY DAY FORCING or THE STARLE**—A new and very distinct type of the well known olive shaped radish, which is of perfect form, smooth skin, fine color, and has very short leaves. This, combined with its extremely quick growth, taking only three weeks to mature, renders it extraordinarily valuable for forcing, while it does equally well in the open ground. Pkt. 5c, oz. 15c, ¼ lb. 30c, lb. $1.00.

**NEW WHITE STRASBURG**—One of the most popular summer radishes grown. Of handsome oblong shape, tapering beautifully to a point; both skin and flesh are pure white and almost transparent; very tender and of a delightful pungent taste.

**SUMMER VARIETIES, MIXED**—Includes all the summer varieties in our list. Gives great satisfaction. Pkt. 10c, oz. 15c, ¼ lb. 30c, lb. $1.00.

---

**WINTER RADISHES.**

Price of all varieties: Pkts. 5c, oz. 10c, ⅛ lb. 25c, ¼ lb. 75c.

The following varieties should be sown in August or September, and stored in pits or the cellar on approach of winter, for use during the winter. Our collection embraces all the desirable sorts. Our Mixed Seed will give great satisfaction.

**CALIFORNIA MAMMOTH WHITE**—A Chinese variety introduced into California; it grows to a large size; flesh quite solid, and of good flavor. Pkt. 5c, oz. 10c, ¼ lb. 25c, ⅛ lb. 75c.

**LONG BLACK SPANISH**—One of the latest as well as the hardest of the radishes. Roots oblong, black, of a very large size and firm texture. Pkt. 5c, oz. 10c, ⅛ lb. 25c, ¼ lb. 75c.

**WHITE CHINESE**—Root nearly cylindrical, six to seven inches long, and nearly three inches in diameter; neck rounded, skin white, flesh white, compact, piquant and very appetizing. Pkt. 5c, oz. 10c, ¼ lb. 25c, ⅛ lb. 75c.

**ROUND BLACK SPANISH**—Black skin, white flesh, and roots globe-shaped. The flavor is piquant. Pkt. 5c, oz. 10c, ¼ lb. 25c, ⅛ lb. 75c.

**CHINESE ROSE**—This variety has become very popular with market gardeners. It is of a half-long shape, pink color, and flesh as solid as an apple. It should be sown during August. Pkt. 5c, oz. 10c, ⅛ lb. 25c, ¼ lb. 75c.

**WINTER VARIETIES, MIXED**—Includes all the winter varieties in our list. Large Pkt. 10c, ¼ lb. 30c, lb. $0.80.

---

**SQUASHES.**

4 GRAND GOOD SQUASHES 15c. 1 Pkt. of Each for

**MAMMOTH CHILI**—The largest of the squash family, being simply immense. The largest squash on record—295 pounds—was of this variety. If you want to secure the premium at your county fair, plant some of this seed. Color, orange yellow, smooth skin; flesh very thick and fine grained, good and nutritious. A profitable variety to grow for stock feeding. Keeps well through the winter. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.50.

**MAMMOTH WHITE BUSH, SCALLOPED**—The squashes are very uniform in shape and wonderfully prolific. They are fit to use very early, are of a beautiful white color, and grow to an immense size—12 to 15 inches across. The bush-like habit of growth is exactly the same as the old variety. Pkt. 5c, oz. 10c, ⅛ lb. 25c, lb. 80c.

**GIANT SUMMER CROOKNECK**—This new strain is even earlier than the common variety; the squashes grow to an extra large size, measuring from 18 inches to 2 feet long, and of finest quality. Their handsome appearance commands an extra price on the market. Pkt. 5c, oz. 10c, ¼ lb. 25c, ½ lb. 75c.

**FORDHOOK**—An extremely handsome variety, bright yellow outside, and straw yellow within. The flesh is dry and sweet, and of the best quality. Placed in a cool, dry room, keeps in perfect condition throughout the winter. It is perfectly free from attacks of the squash borer. Matures early, and is everywhere a sure
SQUASHES (Continued).
cropper. Immeasurably productive. The green squashes can be used at any stage of their growth. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.20.

PROLIFIC ORANGE MARROW—An improved Boston Marrow, two weeks earlier and much more productive. The skin is a rich, deep orange, making the squash of very handsome appearance. It gives a 5 lb. squash at the Hubbard; the flesh is very thick, fine grained and of choice quality. The squashes are in prime condition from September to January. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

HUBBARD—Generally considered the best winter squash grown; flesh dark yellow, fine grained, dry and sweet; very hard shell; will keep till spring; productive, color golden, when ripe. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

YELLOW BUSH—A popular variety. Grows to medium size and of unsurpassed quality. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

ESSEX HYBRID—A very productive squash, of the finest quality, and an excellent keeper, specimens having been kept until June as sound and good as when gathered. Early, quick growth, and can be raised very successfully as a second crop, following early potatoes, and pease etc. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c, post-paid.

SIBLEY, or PIKE'S PEAK—Shell pale green in color, very hard and flinty, but so very thin and smooth as to occasion the least possible waste in baking. The flesh is solid and thick; a vivid, brilliant orange color, dry, and of a rich delicate flavor. They weigh from 8 to 11 pounds. Very productive; ripens its fruit with the Hubbard. It remains in a good dry cellar perfectly sound until the last of March. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

CANADA WINTER CROOKNECK—The best of keepers. Color, pale green; excellent for table use. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

MARBLEHEAD—An excellent variety, resembling the Hubbard. A remarkable combination of sweetness, dryness and delicious flavor. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 75c.

NEW GOLDEN CUSTARD—An improvement on the old Yellow Bush so well and widely known. Very early, of a bright, golden yellow, often producing squashes 12 to 15 inches across. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00.

SUMMER CROOKNECK—Early and productive; small size, bright yellow, hard shell; used while young and tender and can not be excelled. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 75c.

RHUBARB.

Victoria—Very large stalks, from two to three inches broad and from two to three feet high. Excellent for pies. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25.

Rhubarb Roots—By mail, 30c per lb., 4 lbs. $1.00. By freight or express, $1.50 per dozen.

SALSIFY.

MAMMOTH SANDWICH ISLAND—Mammoth, indeed, as compared with the common kinds. It is pure white in color and has all the good qualities of the other, which, with its great size, will recommend it to all gardeners. It should be found in every garden in the land. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25.

Long White—Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25.

TOMATOES.

Our seed is saved with great care. We never buy seed saved at canning factories which usually is poorly mixed and proves a great annoyance and loss to the planter.

1 oz. will produce about 4000 plants. Sow about 2 ozs. of seed in beds for each acre of crop you want to grow.

MILKEDO—Also called Turner's Hybrid, is one of the finest, largest most solid, and most productive tomatoes grown. The heaviest tomato ever grown of this mammoth variety was grown from O.K. Seeds 1 lb. weight of 13 oz. Shaped better, thick stalk; beautiul shape and color; the weight averages from 1 to 2 lbs. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.50.

EARLY ESSEX HYBRID—This is one of the most profitable tomatoes for the market in cultivation. Pink skin, very early and always ripening all over alike. The flesh being very hard and solid makes it one of the best tomatoes for shipping or marketing. We recommend it highly. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.

OPTIMUS—The large handsome tomatoes are free from cracked and are borne in clusters of three to five. The flesh is fine grained and solid, of a bright crimson scarlet color. Very early. One noticeable feature is the splendid keeping and shipping quality of the tomato. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.

IMPROVED TRIFORUM—Fruit large, smooth and solid, fine color; very productive; a well-known and popular market sort. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.

PERFECTION—Shaped like the Acme, but somewhat larger, fully as early, perfectly smooth, blood-red in color, with more solid flesh and fewer seeds and produces more and larger fruit at the end of the season. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.

SELECTED ACME—One of the earliest in cultivation. Fruit of medium size, perfect form, round, slightly depressed at the pole, the color a purplish color. Ripens evenly and has no green core. Bears continuously until frost comes. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00.
GREAT progress has been made in late years in the improvement of the tomato. Quite in contrast with the small ill-shaped, sour specimens of a few years ago are the large, smooth, sweet fruits so easily raised now. Great rivalry exists in localities as to who can raise the earliest or the largest tomatoes. We offer in the GIANT CLIMBING TOMATO the greatest novelty in this line, and whoever raises it, according to directions printed on each package, will have an attraction that will draw all eyes toward their garden.

This is not a tree tomato. The term "tree," frequently applied to tomatoes, is generally intended to mislead. We do not call grapes "Tree Grapes," because they will climb up a trellis. The GIANT CLIMBING TOMATO needs a support to climb upon, when they will grow 10 to 15 feet high, bearing fruit all along the vine from the ground up. The tomatoes grow to a weight in some cases of 5 lb., in size to a diameter of 15 ins. in circumference. Nearly all the tomatoes are smooth and regular in shape; color glossy red; sound to the core, with very few seeds. The flavor is all that can be desired. They are ever-bearing, only cut off by frost. These tomatoes can be grown on the garden fence, on the sunny side of a house or outbuilding, or in any position where a support is provided. The more public the situation the more they will be admired.

We print a few reports. Many more could be given, if space permitted:

"Your Giant Climbing Tomatoes are immense. I have them weighing 2½ lbs., and the people see that they are wonderful." Geo. R. Booth, Laddow, Mass.

"One plant of Giant Tomatoes grew over 8 feet high. The best cluster was 7 tomatoes weighing 6 lbs. all ripe at one time." Wm. Yeates, Titusville, Pa.

"The Giant Tomatoes averaged a yield of nearly a bushel to each plant. One vine grew 14 feet high." H. D. Musey, Rohrstown, Pa.

"It is a pleasure to see your Giant Climbing Tomatoes grow, and any person can well be proud of them. They are mammoth in size and wonderful in tall growth. I have some specimens measuring 16 ins. in circumference and over 6 inches in diameter. Fine flavor and better than I thought they could be. You can I recommend them so highly.

Mrs. Wm. Crabb, West Branch, Cal.

"From the Giant Tomato seed I raised the greatest crop I ever saw. One weighed 3 lbs. and many 2 lbs. each." P. J. Diels, Malver, Va.

"I raised one stem of Giant Climbing Tomatoes containing 37 fruits. My heaviest tomato weighed 3 lbs. ½ oz. one measured 8½ ins. in diameter. They are enormous yielders." T. Harris, Abbott, Neb.

Price of Everitt’s Giant Climbing Tomato Seed.

As this tomato is a very shy bearer of seed the price will always be high, yet when you consider that each plant, with proper care, will produce nearly a bushel of tomatoes, the price should not be considered. 1 liberal package 15c., 2 for 25c., 5 for 50c. Families should club together and get them at wholesale rates.

CAUTION There are the short growing bush (called Tree) Tomatoes and the long growing (called Tree) Tomatoes, but if you want the true Giant Climbing Tomato, order your seed of us and you will not be disappointed.

NEW STONE—This new main crop variety of tomatoes is very large, bright scarlet red color, smooth shape. Its distinguishing feature, and from this it takes its name, is its great solidity. The flesh is very firm. One of the best shippers. A grand canning variety, unsurpassed for keeping. Pkt. 5c., oz. 20c., ½ lb. 75c.

PONDEROso—A mammoth variety introduced by Henderson, for which $300.00 was paid for a name. We will sell you a packet for 10c., or 2 for 18c., or 5 for 50c. It is the most profitable variety for early strawberries. Pkt. 5c., oz. 20c., ½ lb. 65c., lb. 82.00.
LIVINGSTON'S NEW BEAUTY—A fine variety, coming from originator of Acme, Paragon, and Perfection and Favorite. Very distinct from all former introductions. A color is a glossy crimson with a purple tinge. It grows in clusters of four and five, retaining its large size late in the season; very solid, with a tough skin, making it very desirable for market and shipping. Pkt. 5c, oz. 20c, ¼ lb. 65c, lb. $2.00.

LONGKEEPER—This new tomato of recent introduction was originated by E. S. Carman, editor of "The Rural New Yorker." It is claimed by the originator to combine longkeeping qualities, uniform shape, earliness in ripening; as well as productiveness to a remarkable degree. Pkt. 5c, oz. 20c, ¼ lb. 65c, lb. $2.00.

PARAGON—Very similar to that of Livingston's Favorite. Pkt. 5c, oz. 20c, ¼ lb. 65c, lb. $2.00.

Tomatoes for Preserving—Red Cherry, Yellow Cherry, Red Pear-shaped and Yellow Plum. Pkt. 5c, oz. 25c.

TURNIPS—TABLE VARIETIES.

Sow about 1 pound broadcast per acre.

We sell any of the following varieties, unless noted, at pkt. 5c, oz. 12c, ⅛ lb. 20c, lb. 50c, by mail; by freight or personal, per lb. 60c.

Early Six Weeks or Snowball—This new turnip is very early, growing and maturing rapidly. Bulbs beautiful white; medium size, solid. Flavor mild; free from sinews. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

PURPLE TOP MUNICH—One of the earliest in cultivation, making an excellent spring garden turnip. Grows to a large size, solid, crisp and mild flavor. We have the best strain of this popular variety that can be found anywhere. None better.

EXTRA EARLY MILAN—The earliest flat turnip in cultivation. Of medium size, with a bright purple top; leaves few, short, growing very compact. Flesh pure white, of choiceest quality, hard, solid and fine-grained; an excellent keeper. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00.

EARLY WHITE FLAT DUTCH—Size, medium. Flesh white, sweet, tender; rich for table; spring and fall.

WHITE EGG—A variety of very rapid growth; egg-shaped, fine grained, solid flesh.

BREAD-STONE—Extra fine quality. Of medium size, very quick growing, and the roots are very smooth and white. Flesh is perfectly white, fine-grained, and cooks in only fifteen minutes. It is the finest table turnip for winter and spring use. Pkt. 5c, oz. 15c, ¼ lb. 30c, lb. $1.00.

RED or PURPLE TOP GLOBE—This is the most productive variety and one of the hardiest. It is very fine for table; owing to its great yielding propensities, can be grown with great profit for stock.

GOLDEN BALL or ORANGE JELLY—Very beautiful and bright yellow turnip of medium size, sweet and delicious flavor.

Long White Cape Cod—Flesh white, fine-grained, sweet; keeps well.

LARGE WHITE GLOBE—Often attain the weight of 12 pounds; extra good fall and winter, skin white.

Sweet German—Must be sown much earlier than the flat turnips. In the autumn and early winter it is apt to be hard, but softens in time

PEACH TOMATO—This very useful and beautiful oddity is sure to attract attention and favorable comment, whether growing in the garden or served on the table. It is almost identical with some forms of peaches, both in shape and color. The fruit is produced in clusters; is very solid with red interior, and red, pinkish and green blush on the outside skin, which can be easily peeled, like the skin of a peach. Vinous compact in habit and very productive. For preserving, Peach Tomato is hard to beat. Pkt. 5c, oz. 20c, 2 oz. 35c.

LIVINGSTON'S FAVORITE—Ripens evenly and early, holds its size to the end of the season. Is very prolific, few seeds, solid flesh, bears shipping long distances. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $1.85.

CARDINAL—A beautiful cardinal red, very glossy looking when ripe; the flesh of the same brilliant color ripens evenly through, having no hard green core like many others; very few seeds. Round and unusually smooth and solid. Pkt. 5c, oz. 20c, ¼ lb. 65c, lb. $2.00.

SWEDES, OR RUTA-BAGAS.

Price same as Turnips.

CARTER'S IMPERIAL—A hardy sort, excellent for table use or feeding stock. Does not run to long necks. This should be sown a month earlier than the other varieties.

LAING'S IMPROVED RUTA-BAGAS—One of the earliest and best for table. Handsomest variety, hard-closing flesh.

LARGE WHITE FRENCH—Excellent for table use as well as stock. Large size, solid, mild and sweet. A desirable sort.

In July we will publish a SPECIAL TURNIP Catalogue. Send for it.
Few flowers can compare with those from our Summer Flowering Bulbs. So easy of culture and quick in giving returns. The bulbs can be kept over winter, and will continue, year after year, to return in beauty the original trifling investment. Our bulbs are all of the highest grade and will be sent by mail, post paid, at prices quoted. 1-4 doz. at doz. rates.

For every dollar sent in for bulbs, select 25¢ worth extra. Thus, if you send $1.00, select to amount of $1.25.

**Caladium.**

Esculetum (Elephant’s Ears).
The leaves of this giant plant often attain a length of 3 feet. Very suitable for single plant on lawn, beds or margins of water. Attains greatest size in a moist situation. Keep bulbs in dry sand over winter. Each 20¢, doz. $2.00, if doz. same rate.

**New Dwarf French Cannas.**
The new varieties of Crozy's Dwarf Cannas are distinguished by the luxuriance and diversity of their foliage, but more particularly by the unusual size, profusion and brilliancy of their flowers. They are an indispensable adjunct to every well-ordered flower garden. Their charming colors and short, compact habit of growth will make them general favorites. Each, 20¢, doz. $2.00.

**Tuberoses.**

New Excelsior Pearl Tuberoses.

This is the best variety and is a general favorite and the most popular of all flowers for button-hole bouquets. Can be grown in pots or plant in open ground in May. The flowers of this variety are double the size of the common Tuberoce, and are borne in great profusion. Of dwarf habit, perfectly double and of most delicious fragrance.

Extra sized flowering bulbs, 5c each, 6 for 25¢, 45c per doz., 25 for 85c, 100 for $2.75, post paid. By express at expense of purchaser, 100 for $3.00, 200 for $5.50.
GLADIOLUS.

GLADIOLUS—The most beautiful of all summer flowers from bulbs. The long spikes of bloom include in the different varieties almost every desirable color. Plant middle of April to June 1st, 6 to 9 ins. apart and 4 ins. deep. In fall remove to cool cellar till spring. Our varieties are all choice and include many rare sorts.

Choice Seedlings, mixed. Each 6c, doz. 60c.
Red and Pink, mixed. Each 5c, doz. 50c.
Yellow. Each 5c, doz. 45c.
White and Light Colored, mixed. Each 6c, doz. 60c.
Extra Fine mixture. Each 5c, 3 for 10c, doz. 30c; by express, 50 for $1.00, 100 for $1.75, 500 or more at 1½c each.

LILIES.

LILIAM AURATUM—(The Golden-Banded Lily of Japan)—The Yam-yura or Hill Lily of the Japanese. Ivory-white ground, thickly strown with purple studs; the center of each petal has a broad band of light golden yellow extending from tip to base. Grandest of all the Lily family. The flowers measure nearly a foot across, and possess a most delicious fragrance. They should be in every garden.

Price, each, 25c, doz. $2.50, by mail, post paid; by express or freight, 1 doz. $5.00.

LILIAM HARRISII—(Bermuda Easter Lily)—It is a constant bloomer, flowering very early, very showy on the plant or for table, parlor or church decor. Flowers are larger and longer than our sorts, and a great many more of them. A grand pot plant. This is one of our specialties. Each, 20c, doz. $2.00, by mail; 1 doz. $1.50, by express.

LILIUM TENUIFOLIUM—(The Coral-Lily of Siberia)—A very showy and graceful Lily of Siberia. It is of dwarf habit, reaching the height of about eighteen inches, and bearing pretty drooping flowers of a most brilliant shade of red. A little beauty indeed. Each, 20c, doz. $2.00, by mail; by express, 1 doz. $1.75.

SPECIAL OFFER.

For 50 cents we will send one bulb of each Harrisii, Auratum and Tenuifolium, by mail.

Speciosum Album, pure white, very fragrant. Each 25c, doz. $2.50.
Speciosum Rubrum, rose, spotted with crimson. Each 25c, doz. $2.50.

Candidum (Lily of the Annunciation)—This Lily is the emblem of purity. The deep lemon anthers contrast beautifully with the wax-like petals. The fragrance is delicious and never oppressive. It is one of the best Lilies to grow in the house or outside. Perfectly Hardy. Each 15c, 2 for 25c, doz. $1.00.

Tigrinum (Double Tiger Lily)—A plant of stately habit, growing from 4 to 6 feet high, bearing an immense number of double bright orange red flowers spotted with black. Each 15c, doz. $1.30.

LILLY OF THE VALLEY—It is one of the most useful and greatly admired plants grown; bell shaped flowers, pure white; are highly prized for cutting purposes; they are the most charming when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy. Doz. 30c, 25 for 60c, 50 for $1.00.

DOES THIS MAKE YOU THINK

UHIO pays for the expensive catalogues issued by some seedsmen? Who gets the premiums for largest vegetables and red pays the prizes offered by some seedsmen? Who succeeds in growing mammoth specimens as illustrated in some catalogues? Who wants all his seeds raised in the far North? Why send East for seeds that are mostly grown in the West? Why not send an order for O. K. Seeds this year and prove that they are superior to many and unsurpassed by any in the country?
10. **ABRONIA Umbellata**, h.h.a. Very pretty trailing plants. Sweet-scented flowers. 5c.
12. **ABUTILON** (Flowering Maple), t.p. Well adapted for house culture and for bedding out doors. Finest mixed, 25c.

For sowing where no care will be bestowed it is very fine. Large Pkt. 10c. 2 oz. 15c, oz. 25c. X lb. 75c, 1 lb. 82.50.

(48)
Our Cleaning Department has been removed to the fifth story of our building, and by the addition of elevators, bins, etc., and the most perfect cleaning apparatus, we can now clean 4,000 bushels of Wheat, Oats and other coarse seed, or 1,000 bushels of Clover or Grass Seed daily. There is not another such building in the country possessing the facilities we have in this direction and but few enjoy such a trade as we are favored with.

CLOVER SEED.
Price Liable to Vary.

Bags, extra for each 2½ bushels or less, 18c each.
1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express.

COMMON OR MEDIUM RED CLOVER—This is the variety in general cultivation, and is so well known that description is not necessary. By mail, pkt. 10c, lb. 40c, 4 lbs. $1.25. By freight or express, bu. $5.75. Select Quality, bu. $6.00; Highest Quality, bu. $6.25.

MAMMOTH CLOVER. (Pea Vine or English). Like common or medium clover, but of larger growth. Largely grown. Of great value to sow on exhausted land. For hay, we recommend sowing a mixture of this and common clover. Much used for green manuring. By mail, pkt. 10c, lb. 40c, 4 lbs. $1.25. By freight or express, bu. $6.00. Select Quality, bu. $6.25; Highest Quality, bu. $6.50.

ALSIKE. (Trifolium hybridum). This clover is deservedly in repute as one of the best perennial clovers, and is well adapted to this country. From the results of experiments, it is found to thrive on soils which are termed by farmers “cloverless.” For this quality, especially, it has proved a valuable acquisition, and is now generally approved of in all mixtures of grasses and clovers. Should be more generally grown. Sow in spring same as common clover—a field will stand for years. Seed weighs 60 lbs. per bushel and is very small. On this account a bushel will sow from 12 to 15 acres, making it one of the cheapest varieties to seed with. By mail, pkt. 10c, lb. 45c, 4 lbs. $1.50. By freight or express, bu. $7.50. Select Quality, bu. $8.00; Highest Quality, bu. $8.50.

LUCERNE or PEA CLOVER—Lucerne should not be grown on hard, compact soil, or with hard sub-soil, or on sandy, open or porous soil. Even where no other crop will grow, it finds its natural home, and yields enormously. The great value of Lucerne is in its enormous field of sweet and nutritious forage, which is highly relished by stock, either when green or cured into hay. It will grow and yield abundantly in hot, dry seasons, and on poor, light and sandy land, where no other grasses can be grown, for it sends its roots down to enormous depths, they having been found in sandy soil seventeen feet long. Sow about 15 lbs. per acre in March or April. It can be cut three times in a season, and will produce magnificent crops for 10 to 15 years without renewing. 60 lbs. per bu. By mail, pkt. 10c, lb. 40c, 4 lbs. $1.25. By freight or express, bu. $6.00. Select Quality, bu. $6.25; Highest Quality, $6.50.

CRIMSON, or SCARLET CLOVER. (Trifolium incarnatum). A more valuable crop than this annual clover does not exist. It is imperative for farmers who grow clover to sow a mixture of crimson and white clover for an early summer forage or hay crop it is unsurpassed. As a green manuring crop for grain, fruit or trucking crops it gives the very best results, while for improving poor land if it has under it nearly every kind of soil, standing Southern sums and Northern winters, and is now grown largely in a number of States, and has succeeded in every State in the Union where tried. Sow 10 to 15 lbs. to the acre. Can be sown any month in the year. The best months for fall are August and September; for spring March and April. Pkt. 10c, lb. 40c, 4 lbs. $1.25, bus. of 60 lbs. $8.00.

GRASS SEED.
Price Liable to Vary.

Bags, extra for each 2½ bushels or less, 18c each.
1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express.

GRASS IS KING. Our most successful farmers are those who possess large meadows of a high quality of grasses. The low price of grain fails to net satisfactory returns. Stock growing is far more profitable, and by the opening up of extensive foreign markets is not likely soon to be overcome. Hence, seed more ground to meadows. Raise more stock.

TIMOTHY. (Phleum pratense). This is decidedly the best grass for hay, making a large return of strong, dry hay. It dries up some boards, especially if allowed to ripen its seed, yet, if cut in the blossom, or directly after, is greatly relished by all kinds of stock, and especially so by horses, while it possesses a large percentage of nutritious matter in it. Combined with other agricultural grasses. It grows very rapidly and yields very large crops on favorable soils. 45 lbs. to the bu. Sow to 7 to 8 months, spring or fall, to secure it.

By mail, pkt. 10c, lb. 25c, 4 lbs. 75c. By freight or express, bu. $2.75. Select Quality, bu. $2.85; Higher Quality, bu. $2.95.

CUT-MARK RED BLUE GRASS. (Poa pratensis). This is known in some sections as “June Grass.” It is the best pasture for our climate and so nourishing, succeeding finely on hill lands and producing the most nourishing food for cattle; retains its qualities to a late period in winter, and further South affording abundant food throughout the winter. Sow early in the spring or fall, 1 to 2 bushels, per acre. Extra Cleaned, pkt. 10c, lb. 25c, 4 lbs. 75c, bu. $1.25. Weight best lbs. for sale. Fancy, bu. $1.50; Highest Quality, bu. $1.75.

ORCHARD GRASS. (Dactylis glomerata). This is one of the most valuable and widely known of all pasture grasses, coming earlier in the spring and remaining longer in the autumn than any other. It grows better than 2½ bushels per acre, producing an immense quantity of leaves and foliage. It succeeds very well either with it or without with it an admirable hay. It is well adapted for sowing under trees in orchards, and very valuable either for grazing or for hay. 14 lbs. per bushel. Sow 1½ to 2 lbs. to the acre, either fall or spring. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, bu. $1.85. Highest Quality, bu. $2.00.

RED TOP. (Agrostis vulgaris). A valuable grass for moist soils and low lands. It is a good, permanent grass, standing our climate as well as any other, and, consequently, well suited to our pastures, in which it should be fed clean, for it allowed to grow up and seeded the cattle refuse it. On moist, rich soil it will grow 2 feet and on poor, gravelly soil, about half that height. 14 lbs. per bushel. Sow 2 bushels to the acre, fall or spring. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, bu. $1.85. Highest Quality, bu. $2.00.

QUICK GROWING LAWN GRASS.
Fine lawns, grass patches or grass borders add to the beauty of a place almost or quite as much as flowers. In fact, a certain amount of good grass is essential to the proper display of flowery shrubs and flowers. The next important thing to good grass sward is to get it quick. We have prepared a grass mixture which will give a good sward the first year. It is the finest and quickest growing lawn grass ever sent out, and will give the greatest satisfaction. Sown early in the fall or spring, lb. 40c, peck $1.50, post paid. By express, peck $1.00, bu. $3.00.
SUFFICIENT attention is not given to farm seeds by the majority of farmers, and by most seedsmen this department is made of secondary importance. This is not as it should be. These are the crops in which the farmer is most interested. They are money crops. Success or failure depends on them, hence how important that those varieties be selected that are the most reliable and give the greatest results. As an observing man passes through a farming community, those farmers can be pointed out who are enterprising, wide-awake and progressive. The surroundings are a fair index of the farmer. The experimenting farmer is the most prosperous of all. He recognizes that varieties of grain and vegetables are running out (dying) and that new ones must take their place. He procures seed of all the promising kinds, tests them and selects the best to grow. Thus he always has the best, and all farmers who understand their business know that there is a great difference between the best and the poorest varieties of farm crops. We can help farmers along the road to prosperity if they procure their farm seeds of us. They will LIFT THE MORTGAGE and swell the bank account.

Everitt's Mortgage-Lifter Corn.

Reliability is stamped upon every feature of this corn. It is a corn that has not failed to produce a paying crop in the worst corn year we have seen in Indiana in the past six years, and in favorable seasons yields 80 to 120 bushels per acre of the finest yellow corn that ever grew inside of corn husks. We know this corn will please. We will guarantee a rich harvest of the most superior corn that grows, if Mortgage-Lifter is planted. It is early and will mature in northern Ohio, Indiana, Illinois, etc. The grain is very deep, compact and heavy; ears medium to large size; small cob. 70 lbs. of dry corn on the ear, as our seed ears averaged, shelled 62 lbs. of corn, leaving only 8 lbs. of cob. We want every corn grower to plant some of the Mortgage-Lifter Corn. If you plant a field of it your profit will be big. If you don't plant much, plant a small lot, a peck, or pound, or ear. We are anxious to have every person who raises corn made acquainted with its merits without delay. We know it will do them good, and thus secure to us a friend and customer for O. K. Seeds.

The Mortgage-Lifter Corn we introduced first in 1893. Our sales have been large and results beyond the reasonable expectation of parties planting it, as the past two seasons have been very trying ones. In many cases this was the only variety of corn that made a reasonable yield. We regret exceedingly that we have not space to print many of the reports received. Below are samples:

Mortgage-Lifter Corn I planted May 2d. The season was very dry, but my corn did not mind it and turned out 110 bushels per acre of us nice corn as I ever saw.

Notwithstanding the extremely dry season, my Mortgage-Lifter Corn will make 80 bushels per acre. It is truly a mortgage lifter and can be depended upon in seasons when money is generally lacking for such purposes.

J. E. ISENhower, Marion Co., Ind.

Price, by mail, 1 large sample ear, 25c. 4 for 75c, lb. 25c, 4 lbs. 75c. By freight or express, 1/4 bu. 75c, 3/4 bu. $1.00, bu. $2.00, 1 bag 2 1/2 bu. $4.25, 5 bu. $7.50. Except sample ears price is for shelled corn.

Let it be Understood: 1st. That last season we did not have enough of this corn to supply the demand. 2d. That this season our supply is three times as great, but we expect a demand exceeding all previous records. 3d. It will be wise to place your orders early for any of our varieties of Seed Corn.
The Deepest Grained and Most Productive White Dent Corn.

FORSYTH'S FAVORITE

Our Introduction of 1892.

On the preceding page we offer a corn that is remarkable in its reliability and is almost certain to bring success, as far as it can be realized in a corn crop, to all who raise it. On the next page we again offer the wonderful EARLY MASTODON, of which we sell thousands of bushels annually, and in not one season yet have we had a sufficient supply to meet the demand, while on this page and page 53 your particular attention is asked to the greatest of all white varieties of corn, Forsyth's Favorite and First Premium White Dents. This corn was originated in Johnson Co., Ind., in that section known as the Garden Spot of this great Corn State, and in the few years since its distinct characteristics have been brought out, it has made both a local and national reputation. It is conceded to be the largest cored and deepest grained early white corn ever seen in this market. All who see it proclaim it a king in the great corn family.

In describing this corn we must speak of the size of the ears as mammoth, being 8 to 15 inches long, with grains averaging about half inch long, and sometimes contain grains ¾ inch in length. The number of rows on a cob range from 16 to 24, and ears containing 1,500 to 2,000 grains are quite common. Grains pure white, cob white and usually hollow at butt end, which allows the ear to dry out quickly, and enables the grower to crib this corn before smaller varieties are fit. We recommend it for this latitude and all points South, and it can be grown 100 miles North by selecting ground that will admit of early planting. The following well-known farmers of Johnson County attest to the grand properties of this corn, and say it can be cribbed ahead of any of their common field corn, and also that it yields enormously: M. V. Kindle, D. M. Forsyth, W. S. Core, J. S. Mountz, J. T. Walker, A. V. Pendleton, Geo. H. Pendleton, Edward Alexander, etc., etc.

We have sold this corn three seasons, with the most flattering results. It has become a great favorite. Our crop this year is exceptionally fine and notwithstanding the unfavorable season, is thoroughly matured. We have a large part of our seed in ears, and propose while these last, to put a sample ear in each order for ½ bushel or more of shelled corn.

(Continued below.)

We have space for only a few reports; could fill half this catalogue, if space permitted:

"I am very much pleased with the Forsyth Favorite corn. It is the largest corn I ever grew, and withal, is as early as my smaller cored varieties. It is a great money-making corn,"

"As is usual with your seeds, I found the Forsyth Favorite Corn sustained the high recommendation you gave it. I am sure my trial plot yielded 150 bushels per acre of the finest corn I ever saw."  

DAVID ELDREDGE, Cuyahoga Co., O.

"For the Forsyth Favorite White Dent corn I must say, without boasting, that it is by far the finest I ever raised in my farming experience of 12 years, and I have planted nearly every kind. I will plant no other in the future."

J. B. Byers, Ohio Co., Ky.

"Forsyth Favorite White Dent is the largest, heaviest and best corn I ever saw. On a test 52 ears weighed 70 lb.; the cob weighed 11½ lb."  

JOHN WAGGONER, Lincoln Co., Ky.

"30 acres of Forsyth Favorite Corn yielded 2,730 bushels of fine corn as ever grown. The like was never seen before in all this section."  

O. B. Frandsen, Hardin Co., Iowa.

PRICE By mail, post paid: 1 ear weighing 1 to 1½ lb. and containing 1,000 to 2,000 grains, which will raise about 20 bushels of corn, 30c; 4 such ears for $1.00. Those who order first will get the largest ears. 1 lb. shelled 55c, 4 lbs. 75c. By freight or express $½ lb. 75c, $1.00, bu. $2.00, 1 bag 2½ bu. $4.25, 5 bus. $7.50.

The price of this seed should not deter any farmer, who wants to be abreast of the times, from getting a start at once.

(51)
The Wonderful Early Mastodon
Yellow Dent Corn.

All who have tested the Early Mastodon Corn pronounce it the most valuable Yellow Dent Corn, of strongest growth, longest grain, largest ears, smallest cob, quickest to ear, finest fodder, and most productive variety they ever raised. In short, we are fully convinced that if its merits were known by all corn growers, there would be such a demand for seed that no six counties in the famous corn state of Indiana could grow enough seed to supply the demand. Every corn-grower should get enough to plant a field or more, and thus get a variety of corn that will enormously increase his crop, and correspondingly increase his profits. Many bushels of Mastodon Corn can be sold in every neighborhood for seed at a large price, until all are supplied. We never knew, and had such uniformly favorable reports for anything we sold. The growers can not praise this corn, the greatest novelty of the age in the corn line, sufficiently. Read a few reports. We have hundreds more:

"I am well pleased with the Early Mastodon Corn. It was cut down by the frost the 24th of May, but came on strong, and yielded 75 bu. shelled corn per acre."

M. BURNS, Darke Co., O.

"The Mastodon Corn is a marvel of the age. It is the finest corn I ever saw. I can not use words to praise it enough. It is the largest, deepest grained and best of all large field corn, and the earliest I ever saw. It is all you claim for it. All the neighbors want it. I will give you a few words from men of experience who have been at my farm and seen the corn:

E. W. HARRIS, Custer Co., Neb.

"J. L. Knight says: 'It grows under the Mammoth Cub, Riley's Favorite, Chester County Mammoth, Learning, and all the other corn I ever saw. Save me 8 bushels for seed.'"

"A. H. Copsey, an extensive stock-grower, says: 'The Mastodon is a marvel. It is surely perfection. Save me 10 bu. for seed.'"

"F. D. Mills says: 'Wonders will never cease. Mastodon takes the cake. I want 6 bu. for seed.'"

"W. H. Cramer, Sup't Agriculture, at State Fair, says: 'The Mastodon Corn was the first thing that caught the eyes of the farmers. It walked off with the prize. I want 10 bu. for seed.'"

"I could send you dozens of such testimonials, but think the above enough. Yours,

E. E. HARRIS, Custer Co., Neb."

"I am selling seed of your Mastodon Corn at $3.00 per bu. It is the strongest grower I ever saw. Ears quick; wonderful yielder; fine fodder; perfect corn; ears 11 inches long."

E. A. WOODARD, Rock Co., Wis.

"I have grown nearly of the improved high-bred corn, and find Early Mastodon the most wonderful of all, and the handsomest. It grows quick, strong and powerful, has broad, heavy leaves, and large 20 to 35-row ears; ears generally 9 to 11 inches long; gr. is longer than any other variety. Many stalks bear 3 to 8 large ears, a me ears weigh 2 lbs. each, and contain 1,600 grains. The yield was 191 bushels of dry shelled corn to an acre."

ALFRED ROSE, Yates Co., N. Y.

PRICE When the time and labor of selecting and preparing the seed are considered, the price is more than reasonable. Yet, with this corn, price should be no object, as you had better pay $50 a bushel for seed of the Mastodon than plant ordinary kinds at market price. Here is a chance to make farming pay.

By mail, post paid, 1 large sample ear 25c. 5 for $1.00; 1 lb. 25c, 4 lbs. 75c. By freight or express, 5 bu. 50c. 1 bu. $1.75, 1 bag 2 1/2 bu. $4.00, 5 bu. or more at $1.50 per bu.

We have RILEY'S FAVORITE, IMPROVED LEAMING and PRIDE OF THE NORTH Seed Corn at same price as Early Mastodon.
Our artist has tried to faithfully portray the beauty of this grand variety and to a great extent has succeeded.

The large ear is a fair representation of an ear 11 inches long reduced in size. The inches as platted are ½ of actual length. The bill of corn will show style of growth, and with the picture of Mr. Trout, the originator, who is a good sized man, to serve as a basis for comparison, a very clear idea can be had of this corn as it grows in the field. Mr. Trout is the champion corn-grower of his county, and has been regularly excelling all his wide-awake neighbors in his corn product. We name it First Premium, because of the fact that it has been awarded highest honors wherever exhibited. It is a pure white corn on a white cob. Ears grow longer and not so thick as our Forsyth Favorite and grains do not average quite so long. The grains are of fine texture, smooth, compact, sound and heavy. Its purity in color adapts it for making White Meal and other corn products. Matures in 100 to 110 days, is finely adapted to all sections, south of a line 75 miles north of Indianapolis, and will give all growers great satisfaction in quality and productiveness.

The names signed to the reports we publish below are among the wealthiest and most influential men in the neighborhood where this corn originated. All complete addresses are on file in our office:

"I recommend P. F. W. D. Corn to all farmers as one of the best variety of white corn in this state." S. N. Clemens.

"In the lead of all white corn in my county."

Mount Beanigan.

"I cheerfully recommend P. F. W. D. Corn to any farmer in Indiana or any other state as one of the most productive varieties that can be grown in this country."

Scott Curry.

The prize of $5.00 offered for the best 12 ears of corn raised in Johnson County was awarded to First Premium White Dent.

The prize of $5.00 offered for the best 12 ears of corn raised in Marion, Johnson and Shelby Counties was awarded to First Premium White Dent.

"I planted 15 acres of F. P. W. D. Corn last spring and harvested 1,200 bushels. The season was very dry or would have yielded much more. It matures early."

C. H. Atlee.

"This is to certify that I, I. Ray, was expert judge at Indiana State Fair, in 1892, and that I awarded to Lee Trout the first premium on his white corn shown against 20 competitors."

I. Ray, Judge of Farm and Garden Products.

"A dozen ears of the famous F. P. W. D. Corn are on exhibition here. They are extra fine. The yield was 80 bu. per acre, and if the season had not been so fearfully dry, would have been over 100 bu. per acre. This corn was awarded first premium at the State Fair; also first at a number of county fairs and corn contests."

Edinburg.

When it is considered that 1½ bu. of this pure thoroughbred corn will plant about 2 acres and these 2 acres will yield 3 to 100 bus. more than corn that we know is usually raised, the price we ask should not be considered. Try it and be convinced that it is O.K.
A NUMBER OF GOOD THINGS ARE LISTED ON THIS PAGE.

BAGS FREE AT PRICES QUOTED.

BROOM CORN

There is a great demand for Broom Corn and we recommend farmers to plant some, even if no more than an acre. It is a paying crop, as big prices are paid for the brush, besides the seed is equal to oats for feeding. Plant in drills so it can be worked with the cultivator.

IMPROVED EVER-GREEN is the best and purest in cultivation, originated and selected by one of the largest growers of corn. Montgomery Co., Pa., who has for many years had the reputation of having the best in the state, having made his stock famous by selection and improvement for length, strength and straightness of brush. It is of a very bright green color, without the slightest reddish tinge. It makes for the best brooms of any grown; height, 7 to 8 feet. Pkt. 8c, lb. 30c by mail. Peck 75c, bu. $2.50.

SUGAR CANE

Early Amber—The most valuable variety for general cultivation, ripens as for North as Minnesota; very rich in saccharine matter, highly prized for sugar and syrup-making purposes. It will also yield heavy crops of seed, which is excellent for feeding poultry, swine or cattle. Pkt. 8c, lb. 25c, 4 lbs. 75c, by mail. By freight or express, peck 50c, bu. $1.50.

Early Orange—A later variety, suitable for the South or Lower Middle and Western States; requires a longer season, has a much larger and taller ranker in growth. Price the same as Early Amber.

JAPANESE BUCKWHEAT

This variety is now well established and it is conceded by all who have grown it that it yields much more than any other variety. Has grains twice as large. is much earlier and equals the best for flour. We sell very large quantities of the Japanese Buckwheat, and our experience has been so satisfactory that we can unhesitatingly advise every person who contemplates raising Buckwheat to procure this variety to sow. Pkt. 8c, lb. 25c, 4 lbs. 75c. By freight or express, ½ bu. 50c, bu. $1.00, 5 bus. or more, $1.25 per bushel.

Silver Hull—The next best variety. Price the same as Japanese.

MANSURY BARLEY

Six-row, staw bright and very strong; does not lodge on rich ground; heads are long and dashing. Recommended by the Iowa Agricultural Experimental Station as the only variety suitable to grow in that State, and is equally valuable elsewhere. By mail, lb. 25c, 4 lbs. 50c. By freight or express, ½ bu. 50c, bu. $1.25, 5 bus. or more, $1.00 per bushel.

MILLET

German, or Golden Millet—The best variety and largely grown wherever its value is known. It helps out wonderfully when a short crop is threatened, and produces 2 to 3 times as much hay per acre as timothy or clover. Three to five feet high. Sow broadcast, 1 bushel to the acre for hay; ½ bushel if for seed, from May 1st to August 1st. Pkt. 8c, lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 35c, bu. $1.00.

Hungarian Millet—Early; height two to three feet; abundant foliage and slender head; withstands drought; yields well. Price same as German Millet.

FLAX SEED

For sowing. By mail, lb. 25c, 4 lbs. 75c. By freight or express, 5c per pound.

ENSILAGE CORN

Corn for ensilage or fodder purposes is in great demand in dairy districts. What we offer can be relied upon for quick growth, big yields and nutritious qualities. We ship largely to all parts of the state.

Red Cob Ensilage—This superior ensilage corn is selected from experience from among the heaviest cropping variety in cultivation, producing 75 tons per acre. A pure white Dent corn, of large size and handsome appearance. The fodder is sweet, tender, juicy. By mail, lb. 25c, 4 lbs. 75c. By freight or express, peck 40c, bu. $1.25, 10 bus. and over, $1.00 per bushel.

Early Yellow Ensilage—This is a very early variety of corn; very leafy, fine stock, and the best to plant for early use, or late as a second crop on vacant ground; can be planted as late as July 1st. Price same as above.

Correspond with us for price of large quantities of Ensilage Corn.

SPRING VETCHES or

Tares—Sow on rich, well prepared soil. May be used either for feeding in green state or dried like hay. When allowed to ripen, the pea-shaped seeds make an excellent fattening food; a good substitute for corn. When grown for hay, it is sown as late as July, with oats, and a few together are relished by stock. Grown for the grain, sow in April. A splendid plant, especially for hogs to feed and fatten. Sow ½ bu. per acre, broadcast. By mail, pkt. 8c, 1 lb. 25c, 4 lbs. 75c. By express or freight, ½ bu. 10c, bu. $2.50.

FIELD PEAS

Many of the first farmers of the West are planting peas as a stock fattener, especially so for hogs. They are equal to the best for this purpose. Sow at the rate of 2 bu. per acre, broadcast. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, ½ bu. 50c, bu. $1.75.

RAPE DWARF ESSEX—A wheat-like producing plant. No other brassing stock raiser can afford to be without a sufficient acreage of Rape to meet the requirements of his flock of sheep and other stock. Send immediately to the U. S. Department of Agricultural Washington, D. C., for a free copy of the Farmer's Bulletin, The Rape Plant. Pkt. 10c, lb. 40c, 1 lbs. $1.50. By freight or express, per lb. 20c.
The Calgarry Gray Oats. This extremely early, extra heavy, very productive Rust-Proof variety of oats was produced by crossing the Prince Edwards Island Black and the White Russian; producing a beautiful brownish gray oats; a decided new strain of this important cereal. They are very beautiful in growth and grain. The grain shining like polished emery and as smooth as silk. The type is well fixed and combines all the desirable qualities as weight of grain, earliness, rust-proof, great strength of stem and feeding qualities. Careful feeders of horses know that in feeding whole grain oats much depends upon the nature of the hull or chaff. A rough, gritty chaff acts upon the stomach of a horse so as to expel much of the grain undigested. The hull of Calgarry is soft and fine in texture. To illustrate, place one hand in a bag of Calgarry gray and the other in a bag of any other oats. The Calgarry will feel soft and velvety, while the other will feel harsh and woody. Again, grasp a handful tightly, withdraw your hands from the sacks, open them, and the Calgarry will slip from your hand like an egg, while the other will have penetrated the skin of the hand so as to hold many of the oats. All these good qualities, combined with a larger percentage of kernels to berry than any other, makes absolutely the best feeding oats in cultivation. The Calgarry Gray Oats Grow very dwarf, even on strong ground; seldom exceeding 3 feet in length, while 2½ feet is about the average length. This is a great point for those farmers who have rich ground. Nothing short of a moderate cyclone will put them down. They ripen the earliest of all. These oats can be put in shock before Welcome Bonanza, White Russian, etc., turn yellow. This quality of itself is sufficient recommendation to put them ahead of any other variety, as by their early maturity they escape the hot sun, dry weather, storms and rust that prevail about the time ordinary sorts mature. In the important matter of productiveness they have out-yielded all other sorts where placed in competition in experiments and in ordinary field culture.

The extracts from reports of the Illinois Agricultural Experiment Station, given below, will be very interesting and speak volumes.

**Extracts, from Illinois Experiment Station Report.**

**Yield, per acre, Calgarry Gray, 54.8 bushels. Ripe, Calgarry Gray, July 25. Per cent. of kernel in berry, Calgarry Gray, 77.45.**

In the experiments, the above variety led in the particular points mentioned; the number of varieties tested was 59. The average yield was 39.8. The average per cent. of kernel to berry was 69.57.

"I think the Calgarry Gray Oats are superior to any other oats I ever raised. They excel in yield other kinds 10 to 15 bushels per acre. Extra early and my crop weighs 42 pounds per bushel, struck measure. They stand up best and mature plump and heavy under the hottest sun, where other oats are killed."  
S. J. Barefoot, Ford Co., Ill.

"The fame of the Calgarry Oats having spread to my neighborhood, I took pains to test them, and I am happy to be able to say that the results have more than equaled the recommendation given them. They mature earlier and excel in productiveness and quality any kind that I have heretofore grown."  

"I take great pleasure in testifying to the merits of the Calgarry Gray Oats. I find them to be free from rust, of great weight of grain, straw very strong and are a long ways the best feeding oats I have ever known. Extremely early; in fact, the earliest oats I ever grew."  
FRANK L. SKINNER, Ford Co., Ill.

**PRICE OF CALGARRY GRAY OATS.** Remember these are a distinct strain of oats. They will be sought after for seed purposes and we will not be surprised if they make the greatest stir among seedsmen and oat raisers known since the introduction of the Welcome Oats a number of years ago. By mail, pkt. 10c, 1 lb. 25c, 4 lbs. 75c. By freight or express, ½ bu. 50c, 1½ bu. for 1 acre, $2.00, per bag of 3 bus. for 2 acres, $3.50.
Yield over
100 Bushels per acre.

EVERITT'S WHITE SUPERIOR SCOTCH OATS.
The Heaviest Variety of Oats Ever
Sold in the United States.
Choice Cleared Crops Weigh 50 lbs. to the Measured Bushel.

Compare this Weight with common oats at 32 pounds, and oftentimes less. Why grow chaff and straw mainly, when with this variety you can get plump, heavy grain that makes muscle, bone and fat, when fed to your stock? Here's a chance to make farming pay.

EVERITT'S WHITE SUPERIOR SCOTCH OATS—Surpasses all others in heavy weight, thin hull, shortness and plumpness of grain, strength of straw and productiveness. In short, they are the most profitable for farmers to grow and merchants to handle. Their productiveness, weight, and fine qualities place them at the head of the list. They ripen evenly and very early, and notwithstanding they bear a very large, spreading head, filled completely with the plump grains almost as heavy as wheat, they stand up stiff and straight until fully matured. Their strong straw adapts them to rich bottom ground, where common oats will fall down and waste. One of our growers reports a yield of 151 1/4 bus. per acre, actual weight. These are the oats we offer you, and when you see them you will not be surprised that such enormous yields are possible.

Ground that will yield 50 bushels of common oats as usually grown will yield 100 bushels of these.

The following truthful, responsible farmers, who live in the neighborhood where our crops are grown, endorse them as being very early, with stiff straw, extremely heavy and productive, and altogether a profitable variety to grow: Demas Bricker, Louis Fitzigen, Chas. H. Coe, Col. L. F. Larimore, J. R. Headington, Ephraim Daily, Samuel Morey, Wm. Matton, Chas. Twining, L. S. Hall, J. G. Caso, and E. W. Hawkins. These farmers all live in Knox county, Ohio, and would not have sent an article, but add their names and testimony to these fine oats as evidence of their worth, and with the hope that their brother farmers will profit by their observations. They were exhibited at the Hartford (O.) Fair under the name of "Everitt Oats," and received the first premium, and a special recommendation for their fine quality and great weight by the Committee on Farm Grains. Committee-men—Wm. H. Perkins, Geo. N. Jackson, A. R. Sutton.

Want of space forbids us publishing hundreds of testimonials that we have received. Below is a sample:

Geo. W. Myers, who has threshed grain for thirty years, says: "The White Superior Scotch Oats have a good straw, ripen even and very early. For yield, weight and quality they are superior to any other variety I have found in an experience of thirty years threshing farm grain."

Who would not grow these oats in preference to the light, chaffy kinds, which make up the main crops of the country? Be Progressive. Get a variety of oats, the like of which you never saw before, which contain so much vigor that they will produce a crop regardless of the season. The price is low enough that you can sow a field or your entire crop. Sow largely of these oats for profit.

PRICE OF EVERITT'S White Superior Scotch Oats. Remember these oats weigh nearly double common oats to the measured bushel.

We give the standard weight, 52 lbs. for a bushel. By mail, post paid, 1 large pkg. 10c, 1 lb. 25c, 4 lbs. 75c. By freight or express, 3/4 bu. 40c, 1/2 bu. for 1 acre $1.75, 3 bushels (1 bag), for 2 acres $3.25, 6 bushels (3 bags), $5.00. Any larger quantity at $1.00 per bu.

New bags free.

You can well afford to pay $1.00 per bu. for these oats for seed, and this is as low as we can offer to sell them and pay advertising expenses. We have sold thousands of bushels of them since we first introduced them, at much higher prices.

CAUTION We named and introduced the White Superior Scotch Oats and can furnish the genuine article. Another house claims they furnished the seed of this variety that was given an award at the World's Fair. Ask them for official evidence. Come into our house and see the documents. We furnished the seed and have the award.

(56)
If there is one department of our business in which we excel more particularly than another it is the Seed Potato Department. We have always made great specialties of Seed Potatoes. Although we do not introduce one-fourth as many varieties as do some other seedsmen, yet when we send out a new variety it goes out to find a welcome and a home with every grower. Our conservative course has gained for our house the confidence of potato raisers and as a consequence our trade is not excelled in this line by any house in the country.

**Early 6-Weeks Potato.**

Inside the past few years many seedsmen have adopted the plan of sending potato eyes by mail and devote considerable space to explaining the beauties and advantages of the potato eye scheme. It is a good scheme to talk on and will influence some orders from the inexperienced, but it is all wrong. Within one week after the potatoes are cut they have lost a great share of their vitality and if obtained early in the season before planting time has arrived the chances are you have lost one-half of them entirely and the balance will make only a feeble growth. We send by mail, medium size, sound, whole tubers. 1 lb. of these will contain from 5 to 8 potatoes and from 50 to 80 eyes. One pound of potato eyes will comprise from 25 to 35 eyes, and they will not have much flesh at this rate. Note the difference; besides, by our improved method of preparing seed and planting we make one whole potato equal to 3 as usually handled, and that without any extra labor or delay in planting. Will send particulars with every order if requested.

**Still Unequaled.**

The Wonderful Six-Weeks Market Potato. Without exception the earliest Potato in existence and the most valuable for market gardeners, truckers and all early market purposes. A perfect table potato and a wonderful yields.

**INTRODUCED BY US IN 1895.**

Ready for Market in SIX WEEKS. Matures in 72 days. Two weeks ahead of any other variety and has yielded at the rate of over 600 bushels per acre.

**Again Leads for 1895.**

Others may equal it in size, quality or productiveness, but in earliness **EVERITT'S SIX WEEKS' MARKET IS UNAPPROACHED.**

Market Gardeners and all others who grow potatoes, what could you afford to give for potatoes that will produce fine, large, beautiful tubers six weeks from planting, which is two or more weeks ahead of any other kind, if you knew they would positively produce such results? Well, we will say to all who are fortunate enough to receive this catalogue that **EVERITT'S EARLY SIX WEEKS**

(Continued on page 68.)
MARKET will do all this. It is worth its weight in gold for a start of seed to many market gardeners, as with it they can get the fancy prices before other kinds come in market. We offer for consideration the accompanying report from the originator, who has been a potato grower all his life, and is now 54 years old, and from others whose addresses are on file in our office. After reading these reports you can no longer doubt that this is a most remarkable variety. This new potato originated in Ohio and we purchased the original the entire stock and right to introduce it. The originator says: "They have created so much excitement in my neighborhood that I could sell my whole crop to my neighbors at a fancy price.”

Grows medium to large size, oblong to round shape, light, flesh-colored skin; White flesh; very smooth shape; eyes even with the surface; tubers grow close together in the hill. The potatoes begin to form when the vines are only four to five inches high. The top and tubers grow rapidly, and at 6 weeks from planting are a fine marketable size, and reach maturity in 73 days. As a table potato they are not excelled; even for late spring they keep sound and solid. They grow so rapidly and mature so early that potato bugs have no chance at all, making their crop I planted early, before the young bugs become numerous; while for yield they are wonderful, considering their extreme earliness. In 1888 the yield was at the rate of 420 bushels per acre; in 1889 they yielded at the rate of over 380 bushels per acre without manure; while in 1891 they yielded at the rate of over 600 bushels per acre. The originator says about this potato:

"Potatoes have been my favorite crop since I was a boy and I always took great pleasure in seeing what good crops and large yields I could get, but never did I see a nicer potato than this. I have raised a great many kinds, sent for the earliest in the catalogue seed, but raised them from seed, and got some very good ones, but none that came up to my ideal of a perfect potato until I originated this. I have now discarded all others, and raise this for early and main crop, for market and home use. I am fully convinced that I have at last produced the best early potato in cultivation. It combines more good qualities than any other variety in the world.

Grown on a light gray soil, and without manure or fertilizer, they yielded at the rate of 330 bushels per acre, which can be increased by potato manure.

In a careful comparative test with three other varieties, each of which have been claimed to be the earliest, the following results were obtained:

- Variety: March; yield: 420 bu.
- Variety: Savoy; yield: 530 bushels per acre.
- Variety: Pine, matured in 92 days: yield: 190 bushels per acre. Chas. Downing matured in 92 days: yield: 530 bushels per acre. Early Sunshine matured in 100 days: yield: 378 bushels per acre. This test shows this new potato to be fifteen days earlier than any of the above and far more productive.

REPORTS.

See reports on next page.

We can not afford to give full address, as then orders that should come to us might go to these people, and we could not pay our expenses. We could print hundreds more if space permitted.
The photo-engraving on page 57 was made direct from potato prints by John L. Saum, of Paulding Co., O., who writes as follows:

Mr. J. A. EVERITT, Dear Sir—I send you to-day by freight the product of forty hills of Six-Weeks Potatoes. They were dug the morning, and grew in forty-three days. They were grown from one-eye seed. I have just begun farming on my own land, and am not fixed yet for pushing up a crop of early potatoes. These were covered with a breaking plow and given very ordinary treatment. I think I can beat it next season. Several people who saw them were astonished. I expect to have a much larger crop next year.

JOHN L. SAUM.

The Six-Weeks Market potatoes take the cake. All the seeds I buy from J. A. Everitt beat the world.

"I like the Six-Weeks Potatoes very much. I divided with my neighbors. One of them says they are the best he ever saw. They are excellent keepers. They are first-class in every respect."

The Early Six-Weeks Potatoes did well with me. I could sell all I dug for seed.

JOHN H. COCHRAN, Jeff. Co., O.

"One pound Early Six-Weeks Market Potato yielded 147 pounds of fine, sound, smooth tubers. Ripened in 72 days, and produced marketable potatoes in 6 weeks, as you claimed. This is the most valuable variety of potatoes ever introduced."

"You have got it this time—I mean the best early and the earliest potato in existence. We had the Early Six-Weeks Market Potato large enough for the table in 6 weeks from planting. The seed outyielded all our other varieties."

AUGUST BROENKNER, (Gardener), Allegan Co., Mich.

"$10 per bushel would not buy my Early Six-Weeks Market Potatoes if I could not replace them for less. They are the earliest of all, and a heavy yielder. I predict they will be universally grown by market gardeners for early, and those gardeners who get them first will reap handsomely."

JACOB E. STILSON, Onondaga Co., N. Y.

"My Early Six-Weeks Market Potatoes have proved to be as early as you represented them, and a fine yield of sound, smooth, and best quality. They are very valuable."

C. E. WARD, Sullivan Co., Ind.

"This is the finest potato I have ever grown. The yield of the Early Six-Weeks Market Potato was the best for the yield and the earliest I had this season. They are one to two weeks earlier than the Market Potatoes of the other sizes."

H. H. ATTWORTH, Licking Co.

"Planted the Early Six-Weeks Market Potato May 3. They grow fine, and we had new potatoes cooked June 23. They are the earliest we ever had."

DANIEL DONOVAN, Carroll Co., Tenn.

"Our Early Six-Weeks Market Potato produced over one hundred fine potatoes, that in the bushel, measured. They are the earliest to make market potatoes, and the earliest to mature of any I ever saw."

JOHN GILBERT, Meek Co., Va.

"Twenty hills of Early Six-Weeks Market Potatoes yielded over 800 bushels. They bear out your claims for earliness, quality and productivity. Thanks for calling my attention to them."

"I would give hundreds of dollars to control the growing of the Early Six-Weeks Market Potato for this market, as they can be put on the market two weeks ahead of any other seed, which means hundreds of dollars' profit to a large grower."

W. HENRY MORRIS, Cuyahoga Co., O.

"You can not praise the Early Six-Weeks Market Potato too much. Gardeners should not think of doing without them. I dug 50 bushels off ¾ acre, beginning 6 weeks from planting, which averaged me 80¢ a peck. They are wonderful."

G. R. HIXON, Madison Co., Ill.

"The 6-Weeks Market potatoes have done well for me. Last season I grew nearly all kinds of potatoes, and they were not the best crop of fine, large potatoes, nearly a full yield, and tubers large, with very few small ones; quality excellent, very early; also they were marketed the second year as well as the first."

J. W. BAKER, Bureau Co., Ill.

The Early Six-Weeks potatoes have done well for us. The only trouble is they come on first to eat, and are left for a few days before they are used up.

C. C. SHAW, Licking Co., O.

"The Early Six-Weeks are grand. We had fine potatoes in 6 weeks from planting; dry and mealy as old potatoes. Early Ohio came three weeks later."

"The Early 6-Weeks Market Potato is splendid. I find them the best table potato I have had since the Peachbrook or the G. H. Baker."

"I consider the Early 6-Weeks Market Potato the earliest and the best potato I have ever raised."

G. SAMUEL MCKAY, Tipton Co., Ind.

"The Early Six-Weeks Market Potato did exceedingly well; raised at the rate of 400 bushels per acre; some weighed 1½ pounds. We think the blossoms produced on the Early Ohio's, and they are earlier and better yieldser."

S. Hoffmann, Preble Co., O.

"Am well pleased with the Early Six-Weeks potato. It is the very finest quality for table, a good cropper, free from rot and blight."

A. E. STUPEL, KnoX Co., Me.

"The Early 6-Weeks Potatoes are all we ever saw, and they are very early and good yielders. Planted them the 19th of April, and the last of June (4 weeks). They were ready to dig, and good size, too; no marbles."

R. POLING, Monroe Co., N. Y.

"The Early Six-Weeks Market Potato excels all. The tubers are larger, mature earlier, and in all respects are superior to others that I have tried."

B. F. JANNEY, D. C.

"The Early Six-Weeks Market Potato did well in every respect. They are extra early, cook mealy, good yielders, of nice size, average $2.50, and all the hill potatoes I have ever grown."

M. C. McVey, Allegany Co., N. Y.

"Out of seventeen kinds of pota 

The 6-Weeks Market Potatoes were true to your statement. In just 6 weeks from planting, dug good-sized potatoes."

C. CARROLL, Pipetsonne Co., Minn.

"Those 6-Weeks Market Potatoes were true to your statement. We have hundreds of reports equally as good, but lack of space will not allow us to publish.

Don't conclude that the price is too high. You can not well pay too much. Those people who bought small lots years ago have made big money from their investments. The price of the EARLY SIX WEEKS MARKET POTATO is not likely to be very low in future years, as they come so early and command such a high pricle in market that very few are saved for seed.
The greatest yield ever known, at the rate of 1,391 1/2 bushels per acre, is recorded for the GREEN MOUNTAIN. This potato has had the greatest sale of any of our introductions, yet there are neighborhoods where they are unknown. Our advice is, obtain them at once.

Our perpetuated stock is as productive and of as fine quality now as when first offered.

To secure this potato, we paid the enormous price of $300 for one and one-half barrels, the entire original stock.

This wonderful medium late potato was raised from seed borne on the Dunmore, impregnated with pollen from the Excelsior, originated in Vermont, and was introduced by us in 1883. That it is an extraordinary and exceedingly valuable variety there is not a doubt. Its handsome form, white skin and large size recommend it everywhere. The flesh is white and fine grained, cooks dry and mealy and is of superior flavor. This is the case when first dug, and they retain their good cooking qualities and keep sound and perfect until the new crop comes again. As a variety to keep for late spring use it has no equal. Vines grow vigorously, foliage deep green, the tubers grow compactly in the hill, which is completely crowded with fine, large potatoes. They ripen in August if planted in April, and in the important matter of productiveness they are perfectly marvelous. This quality combined, as it is, with fine appearance and good table qualities, makes the Green Mountain one of the most valuable late varieties in the country, and in supplanting all other late potatoes in sections where it has been introduced. Read the reports from the Rural New Yorker Experimental grounds:

Green Mountain Potato was planted April 7 and the crop harvested August 27, the variety being, therefore, a late intermediate. They were dug under the supervision of E. Williams, Secretary of the New Jersey Horticultural Society, and Charles L. Jones, of Newark, N. J., who, with the editor of the Rural New Yorker, weighed and estimated the yield, which was at the rate of 1,391 1/2 BUSHELS PER ACRE. There was an average of 11 2-3 to the hill and an average of 3-4 lbs. to the hill. They were planted two eyes to the hill, one foot apart, in rows three feet apart.

This is the largest yield of potatoes ever raised on these Experimental Grounds.

E. S. CARMAN, Editor.

Also, from a letter from the Editor of the Rural New Yorker, under date of December 6, we quote: "Of all the potatoes we have ever tested, this Green Mountain yields the most. It is an immense yielder." Again Mr. Carman wrote us under date of October 17, after trying them the second year: "The Green Mountain Potato surprises me. They yield well, considering the desperately bad season. They were the best of any (there were nine of the best varieties he could select from all over the country) in the half acre poor soil plot, and yielded at the rate of 280 bushels per acre. This yield is, for a horrible season, the worst we have had for years, a very fine one. Had the crop been at all favorable we would have DOUBLED the yield easily." It should be remembered that the soil on which the above potatoes were grown was very poor. This kind of soil was selected purposely. There is probably no person in the country who is a better judge of new potatoes than Mr. Carman, and such words as above coming from him must carry great weight. To secure control of this new variety we paid the enormous price of $300 per barrel for the original stock.

The Green Mountain Potato is positively one of the best things we offer in our catalogue, and we guarantee them to not only give entire satisfaction, but they will surprise potato growers by their great yield and fine qualities. We know, if we were able to convince each person who receives this catalogue of their real merits, not the least exaggerated, that the demand would be so great that it would be impossible to supply it. You will not be disappointed in this potato. By mail, postpaid, 1 bu. 25e, 1 bu. 75e. By freight or express, 1-4 bu. 50c, 1 bu. $1.75, bbl. $1.50, 2 bbls. or more at $1.35 each.

SAMPLE REPORT.

We have received thousands as good since we first sold this famous potato.

The Green Mountain Potato surprised everybody in this section of the country. They yield about double our other kinds, and are just right for fancy city trade. Bankers and merchants are having me fill their cellars at 10 to 30 cts. per bu. above the market. I will grow no other for main crop until the Green Mountain runs out, then I hope you will have another to take its place. S. E. GARBER, Hamilton Co., O.

CAUTION.

To our knowledge certain unscrupulous parties have sold other inferior varieties of potatoes for Green Mountain, thus defaming their fair name and justly great reputation. We caution all parties to buy where they will get the genuine article, and thus avoid disappointment.
The Rural New Yorker Potato.

Wonderful in Productiveness, Superior in Quality. This Great Potato is a Leader.
Plant this Potato to Make Farming Pay.

To all our customers who have bought of us in the past such celebrated potatoes as the Mammoth Peart, O.K., Mammoth Prolific, the Everitt Green Mountain, and the early Six-Weeks' Market, we announce that this Rural New Yorker No. 2 is worthy their careful attention and extensive cultivation. Thorough trials, both in America and in Europe, have proved it to be one of the most valuable sorts.

It is entitled to stand abreast with our great Green Mountain as a general cropper. We are ready to state our reputation on the Rural New Yorker potato pleasing our customers. It is immediate in season, ripening about September 1st if planted about May 1st. Very distinct and beautiful in appearance, differing from any other variety. The general shape is shown by the illustration, except oftentimes they run abruptly to a point at the stem end. They are flattened, being much broader than thick through. This is a very valuable feature, as no difference how large the tubers grow (and they grow very large) they will always cook through quickly and easily. Skin is white, surface very smooth, with the perfectly even. Flesh of the whitest and has not a superior as a table potato. We particularly emphasize the great vigor of growth of this variety, which enables it to resist disease, blight and bugs to a remarkable degree and yield heavy crops even in unfavorable seasons. Our own crops and reports from our customers places it well in the lead in point of productiveness. In six crops selected, the average yield was 429 bushels per acre. The Rural New Yorker has received more favorable reports from the agricultural press than any other variety in late years, therefore it is not necessary to dwell on its merits in this catalogue. We guarantee our seeds to please and the crop to be highly satisfactory.

REPORTS FROM CROVERS.

"I am able to report very satisfactorily on the Rural New Yorker Potato. They meet my ideas of a perfect potato exactly. The yield is large; quality superb. Appearance recommends them in every market; resist drought and bugs; free from disease and unexcelled for winter keeping."

P. W. Collins, La Salle Co., Ill.

"From 1 pound Rural N. Y. No. 2 Potato I raised 394 pounds of magnificent potatoes. A $10.00 bill would not tempt me to part with them."

"The Rural N. Y. No. 2 Potatoes have sustained your high recommendation. They are the finest and best I ever raised, and the like of them was never seen here before. I could sell all at a big price if I wanted to part with them, but want to keep all for seed."

J. F. Nyte, Stark Co., O.

Above are samples of a great many reports that want of space will not permit us to publish.

Price by mail, 1 lb. 25c, 4 lbs. 75c. By freight or express, ½ bu. 50c, bu. $1.75, bbl. $4.50, 2 bbls. $8.50, 5 bbls. or more at $4.00 per bbl.

GET NEW BLOOD.

A great many opportunities are lost in this world for want of a little courage. Why wait until next year to improve your crops? This year will never come back. Use it now and when next year comes you can improve it also. If you want to consult your brothers and uncles and cousins about this or that thing, the chances are the season is past before you decide. This plan would do before the flood, when men lived several hundred years.

In this nineteenth century, when everything goes with a rush, you must keep up with the procession or be trodden in the dust.

We have always preached the necessity of changing seed frequently. We know it costs a little money to start with. We are sorry there are so many expenses connected with the seed business, as we want to sell at prices that will make it possible for everybody to get our seeds.

The following combination will allow those people, who can not buy large quantities of each, on account of lack of money or will not on account of lack of faith, to get a start and see what improvements are being made year after year. It should be very popular:

FOR $5.00 We will send you 1 lb. 2 ½ bushels of rural New Yorker and one each of the following: Everitt's Colossal, Rural New Yorker, Early Everitt, Green Mountain and Early Six Weeks Market Potatoes; White Superior Scotch and Calif Geary Gray Greens; Mortgage Lifter, Forsyth Favorite, Mastodon and First Premium White Dent Corn. All this is worth $6.40 at catalogue prices. This collection will completely revolutionize the crops on your farm.
baked; very delicate flavor. Tubers oblong and flattened on sides; thus allowing them to cook through quickly, regardless of size. Tubers grow bunched in the hill, and are easily dug by hand or machine. They ripen medium late, and in keeping qualities for fall, winter and spring are unexcelled.

We need not say that we recommend this potato highly. The fact that we give it a place in our catalogue is evidence that we regard it with great favor, and that our reputation as potato experts will not suffer when it is put to the severe test of general cultivation.

Every person who receives this catalogue should avail himself of the opportunities presented to make money. The new potatoes we offer will be in demand for seed until all growers are supplied. If one enterprising person in each neighborhood will undertake to grow a crop of them, he will find a market for them at home at a high price. Many a great business had a small beginning; as an illustration, the business which this catalogue represents is the direct result of 30 cents invested in a new variety of potatoes, not a great many years ago. The price of Everitt's Colossal Potato we will make moderate, so every person can get a small or large amount without delay.

By mail, post paid. 1 lb. 30c, 4 lbs. $1.00. By freight or express, 1/4 bu. 75c, bu. $2.50, 1 bbl. $6.00. We will pack 1 bbl. Colossal and 1 bbl. of Everitt's Onward for $11.00. One barrel will plant one acre, or equal three barrels by our improved process of preparing the seed. Full particulars will be sent to every purchaser, if requested.

Potatoes by Mail.

See remarks "Potato Eyes or Whole Potatoes" on page 57. There are many people who want only a few potatoes, or living at such a great distance the transportation charges would prevent them being potatoes freight or express. To these we advise our potatoes by mail in boxes as shown above. With each order will be sent full particulars of our improved method of preparing the seed, which makes 4 pounds equal 12 pounds as ordinarily handled.
EARLY EVERITT is the most productive early potato now in cultivation, and is so productive that it is planted by many large growers for both early and late crops. Its fine form is shown by the accompanying engraving; eyes even with the surface; color of skin light pink. A most beautiful potato in shape and color. Flesh is fine, solid, white, and of surpassing quality for the table. Growth strong and rapid, setting tubers very early, which attain a large size in a very short time, and ripen with the Early Rose. Tubers grow very large, frequently weighing over two pounds apiece. Yield astonishes old potato growers, who acknowledge they never had so productive an early potato.

No grower who is ambitious to make the most money out of potatoes should fail to grow the EARLY EVERITT POTATO.

Below we print a few testimonials, which are only a few taken from hundreds that we have received praising this fine potato, but which lack of room prevents us from publishing:

"From 1 lb. of Early Everitt Potatoes I raised 63 lbs. of fine tubers, many weighing over 1 lb. each, notwithstanding the unfavorable season (no rain from July 1st to 10th). I am very much pleased with them and will plant all next season, as they appear to be exactly suited to our soil."  

"The peck of Early Everitt Potatoes yielded 15 bus. My Green Mountains took first premium at our county fair over 10 varieties."  
R. E. Chambers, Owen Co., Ind.

"The Early Everitt has proved to be a very fine potato, yielding with me as high as one bushel from 15 eyes of seed, or a bushel to the rod of row, or 800 bushels per acre. I dug specimens to-day that weighed 2 pounds each."  
S. E. Muth, Juneau Co., Wis.

"One pound Early Everitt Potatoes yielded 2 bushels of nice potatoes as I ever saw. Mrs. Raines thinks the quality better than the Early Rose."  
H. Raines, Hendricks Co., Ind.

"One tuber of Early Everitt Potatoes made 8 hills and raised 100 potatoes. Some weighed ½ lbs. each."  
Alban Frost, Perry Co., Mo.

"I planted the ½ lb. of Early Everitt Potato on the 6th of July and dug them on the first of October. The weather was very dry through June, July and part of August. The ground had no manure for six years, and I had 45 lbs; one measured 20 inches around lengthwise and weighed 2½ lbs. I shall keep them all to plant next year."  
F. R. Collins, Elkhart Co., Ind.

"From ½ lb. Early Everitt Potatoes I raised 35 lbs. of such nice, smooth potatoes as are seldom seen. My common kinds were almost a failure on account of dry weather, the Early Everitt yielding four times as much and better quality."  
G. A. Philippi, Outagamie Co., Wis.

"From ½ lb. of Early Everitt Potato I raised 20 pounds of the nicest potatoes I ever saw. The Shepard Radish is the largest I ever saw."  
A. F. Hand, Clinton Co., Ia.

PRICE—By mail, post-paid, 1 lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 50c, 1 bu. $1.75, bbl. $4.50, 2 bbls. $8.50, 5 bbls. or more at $7.50 per bbl. You can afford to plant largely of this potato.

HYBRIDIZED POTATO SEED.

New varieties of potatoes are originated by planting the small seed taken from the balls that grow on potato tops. The best varieties are usually produced from hybridized seed. This seed that contains the blood from two or more varieties mingled. We offer the best hybridized seed that is bound to produce valuable new varieties. Pkt. 20c.

SOUTHERN CUSTOMERS By our favorable location, neither in the extreme ice-bound north, nor in the warm sunny south, we are able to keep our potatoes over winter in prime condition, and yet can ship southern orders from March 1st to 15th, putting them in the hands of our southern customers in time for early planting, direct from our cellars, at moderate charge for freight.

FULL ADDRESS Of each party whose testimonial we print in this catalogue is on file in our office. If we were to give the complete address, orders would go to them for what, plus they may have, and we would be left stranded with no income to pay our advertising expenses. This by way of explanation.
Everitt’s "Perfection" Broad Cast Seed Sowers.

For Sowing Wheat, Oats, Eye, Rice, Flax, Grass Seed, Clover Seed, etc. In fact, any kind of Seed Broad-Cast.

No careful, economical farmer will continue to sow his seed by hand (the old style) when he can get one of these machines at our reduced prices. They will save their cost almost daily in saving of seed, to say nothing about saving of time and more even distribution, which will have a great effect on the crop.

They will Sow from 4 to 8 Acres per Hour at a Common Walking Gait.

The Crank Seeder will be preferred by some. It is the same as the other, except the gear. We guarantee either one to give entire satisfaction.

Price of this machine reduced from $5.00 to $2.50 each.

These machines when first invented sold for $15.00 each. Valuable labor-saving, seed-saving, crop increasing machines. The seed is not thrown upward, but distributed right and left evenly, and will save at least one-third the seed used in hand-sowing. They are operated by a transverse motion of the bow, or a crank which revolves the distributor and works the vibrator rapidly. It is the only seed sower having a satisfactory vibrator which prevents the seed from clogging. They are quickly adjusted to sow any quantity desired. The drum sows one bushel, made strong, well finished and weighs about four pounds. It will last many years, at a row; I will sow 400 feet, but you can sow 48 feet, flax seed 36 feet, grass seeds from 27 to 36 feet. These are the best machines ever invented for the purpose, and should be in the hands of every farmer. Satisfaction guaranteed.

PRICE—Bow Seeder, each, $2.00. Crank Seeder, each, $2.50. Agents wanted. See below. For 25 cents each, extra, we will pay express for any destination cast of the Rocky Mountains.

A GOOD BUSINESS.

Have you some spare time? Can turn it into money by selling EVERITT'S

Hand Seed Sowers. No risk. We guarantee these machines. They are light, and can be carried on back of horse to house. Nearly every person will buy them when they see them. There are no confidential terms. Any person can engage in this business. The only condition is you must order a certain number, to show that you are buying to sell. See below. For 25 cents each, extra, we will pay express for any destination cast of the Rocky Mountains.

They will save about 40% of the seed by hand sowing, save half your time, make your work easier and distribute the seed evenly, thus greatly increasing the crop.

ALL ARTICLES MARKED WITH A WILL BE SENT BY MAIL, POST PAID. OTHERS GO BY FREIGHT OR EXPRESS AT EXPENSE OF PURCHASER FOR TRANSPORTATION.

A FINAL WORD! Since you have examined this Catalogue through to the last page, we trust you are ready to place your order for O. K. SEEDS. We certainly have tried to merit your patronage by placing before you a catalogue of moderate expense, and giving you every advantage possible in price and quality of goods. We believe you are an intelligent reader, and can see that the facts bear out our statements. Others may tell you their seeds possess some wonderful qualities that make them superior to all others, and charge two prices for them. DON'T BE DECEIVED.

The Quality of O. K. Seeds is never reduced, if we do reduce price. Buy them at the moderate price we ask, and keep the balance of money in your pocket.

In closing our Annual Catalogue we assure all who order from it that their orders, whether for 10 cts. or $100.00 worth of goods, will receive the most careful attention, and shipment will be made at once. WE ARE ALWAYS AT YOUR COMMAND.

EVERITT'S

CELEBRATED MAN-WEIGHT

FARM AND GARDEN TOOLS

THE GREATEST LABOR-SAVING AND CROP-PRODUCING MACHINES MADE.

SEE INSIDE PAGES FOR FULLER DESCRIPTIONS.

View No. 1 on this page shows the Man-Weight breaking up the ground. It is not intended to break up very hard ground, although if a man or a boy pulls ahead, almost any work in this line can be done. To loosen up ground that has become compact, it is just the thing.

View No. 2 pulverizes the ground after it is broken up, and destroys weeds at a great rate.

View No. 3 makes furrows to receive seeds, potatoes, etc., and covers the seed.

View No. 4 covers seed in rows, or banks up earth on both sides of the plants.

View No. 12 is an onion harvester, and the best one made. The adjustability of our drag bars, moving sidewise or up and down, makes the work lighter and the tool more effective.

View No. 5 is the best drill made. It plants all kinds of seeds, in hills or drills, as desired, covers and marks out the next row. Small farmers need not buy an expensive corn drill. This will do the work as well, and the cultivators will take care of the crop as it grows, thus doing away with much machinery, also saving the expense of keeping a horse.

Views 6, 7, 8, 9, 10, 11, are adapted to almost all kinds of cultivation and weeding. When you know what you want to do, you can construct the machines to accomplish the desired results.

PRICE. The Man-Weight cannot be sold as cheaply as some old style machines. They are made on the same plan as the large two horse cultivators. Yet when the quantity and quality of work they will do is considered, as well as the ease of doing it, they would be cheap at twice the price we ask.

Single Wheel Machine with 5 sets of tools . . . $6.00
Combined Single and Double, 5 sets of tools . . . 8.00
Combined Single and Double, and Drill No.5 . . 12.00

Everitt's Man-Weight Machines, although invented and patented in 1891, are already sold all over the world where seeds are sown and plants grown.

Ask your dealer for Everitt's Man-Weight. If he does not keep them and will not get them, send direct to us. Don't be influenced to take any of the old style machines. Life is too short, time too valuable, and competition too great, to waste your energies with them.
